ABSTRACTS SUBJECT INDEX TO VOLUME 111

ABDOMEN, Blunt trauma to, 137; injury of viscera of, due to nonpenetrating trauma, 137; spontaneous rupture of hypernephroma simulating acute surgical, 137; repair of hernias of, with dermis transplants, 138; diagnosis, management, and prognosis of injuries of; with special reference to massive intestinal resection, 146; blunt trauma of, 243; indications for operation in trauma of, 243; significance of reducible inguinal hernia in closed injuries of, 243; spontaneous hematoma of rectus muscle of, 243; tumors of, in infants and children, 244; findings on plain roentgenograms of, associated with mesenteric vascular occlusion with possible new sign of mesenteric venous thrombosis, 297; role of thoracic duct in metastases of tumors of, 388; surgical considerations of nonpenetrating injuries of, 443; familial recurring polyserositis simulating acute surgical condition of, 448; stratigraphic studies of neoplasms of, 504; hematoma of rectus abdominis muscle in pregnancy, 541; prevention of adhesions by instillation of prednisolone acetate in, 541

Abortion, Value of pregnanediol excretion test in prognosis of, 65; colpocytologic study in cases of threatened, during first trimester of pregnancy, 164; vaginal cytology as guide to treatment of habitual, 164; "clear glands" in endometrium in diagnosis of uterine, and contribution on delayed menstrual discharge, 164; habitual, caused by cervical incompetence; simple method of treatment, 164; vascular collapse complicating septic, 165; enterobacillary septicemia and bacterial shock in septic, 165; septic, 165; therapy of threatened, and premature labor, 465; surgical management of incompetent cervix, 465; antihistaminic drugs in threatened, 466; effect of 17-α-methyl-19-nortestosterone (orgasteron) in treatment of threatened, 466

Adhesions, Prevention of, by intra-abdominal instillation of prednisolone acetate, 541

Adrenal glands, Metastasis of malignant tumors to, 76; reconstructive processes of adrenal cortex and parathyroid function, 405

Adrenalectomy, Tumor development in adrenalectomized rats given inoculations of aged tumor cells after surgical stress, 303; selection of breast cancer patients for hypophysectomy or, 429; prophylactic bilateral, and oophorectomy for advanced cancer of breast, 430; bilateral, in treatment of thromboangiitis obliterans, 482; and hypophysectomy for advanced cancer of breast, 533

Aldosterone, Excretion of, in hypopituitarism and after hypophysectomy in man, 122

Amphotericin, Experience with, in therapy of histoplasmosis, 130

Amputation, And artificial limbs, 281; of lower extremity in emergency surgery, 564

Analgesia, Promazine for obstetric sedation, 166; promethazine in obstetrics, 166; quantitative study of *d*-tubocurarine in man during diethyl ether, 399

Anastomosis, Operative treatment of ulcers of, 448

Anemia, Atrophic gastritis as possible precursor of gastric carcinoma and pernicious, 247; splenectomy in idiopathic pancytopenia with, and without clinical splenomegaly, 460; exchange transfusion in cases of acquired acute hemolytic, 496

Anesthesia, Perineal, in primiparas, 65; spinal, for cesarean section, 69; technique of, for prostatectomy, 71; hypnosis as adjunct in anesthesiology, 95; induction of, in young children, 95; fluothane compared to chloroform and ether in mice, 96; effects of ether, cyclopropane, nitrous oxide, and fluothane upon lung alveoli; experimental study on mouse lung by means of light and electron microscope, 96; effect of arfonad on monkey, 96; value of oxygenation prior to induced apnea, 96; effect of succinylcholine on intraspinal fluid pressure, 97; and operative cholangiography, 97; complications of endotracheal, associated with head and neck surgery, 97; complications of epidural and spinal; comparative study, 98; complications from, in plastic surgery, 98; preparations for instrumental manipulations in urology, 172; electrocardiogram during surgery and, 196; anesthetic significance of serotonin secreting carcinoid tumors, 196; obstetric, at Toronto General Hospital, 197; controlled hypotension in urologic surgery, 197; urinary difficulties after spinal, 197; fatalities in surgery and, 197; for obstetric emergencies, 265; continuous peridural, 291; endotracheal intubation; effects on blood pressure and pulse rate, 291; endotracheal, and trauma incident to endotracheal intubation, 292; hazard of, in ophthalmic surgery, 292; rediscovery of air for, in thoracic surgery, 292; surgery in asthmatic patients, 292; in cesarean section, 292; change in renal volume by spinal, with associated treatments, 293; vomiting by outpatients after nitrous oxide, 293; breech management with caudal, 370; influence of technique of, on oxygen consumption during total cardiopulmonary bypass, 397; individual variations in CO_2 balance and ventilatory response, 398; potentiation of thiopental by derivatives and analogues of phenothiazine, 399; cultured human respiratory epithelium; its use in comparison of cytotoxic properties of local anesthetics, 399; quantitative study of *d*-tubocurarine in man during diethyl ether analgesia, 399; advantages of endotracheal, in surgery of ear, nose, and throat, 399; anesthetic management of penetrating wounds of heart, 400; trichloroethylene, in obstetrics, 400; therapeutic use of local, 500; methoxyflurane for neurological surgery, 500; axillary arm block, 500; spinal block during labor, 501; epidural, in obstetrics, 501; management of patients with trauma, 501; prolonged apnea after administration of succinylcholine, 501; relief of pain and paresthesias by nerve block distal to lesion, 529; concentration factor in solutions for local, 568; clinical and experimental studies on effects of succinylcholine, 568; incidence and prevention of muscle pain following administration of succinylcholine, 568; electrophysiologic study on sensory blocking mechanism of inhalation anesthetics: nitrous oxide, ether, and cyclopropane, 569; experiences with cardiac catheterization using halothane compressed air, 569; effect of ergotamine on blood pressure, especially in spinal, 569

Aneurysms, Pathogenesis and natural history of intracranial, 21; diagnostic and therapeutic problems of brachiocephalic, 85; new surgical approach to cerebral saccular, 219; rupture of congenital intracranial, in pregnancy, 219; experimental studies with extracorporeal circuits as method to enable surgical attack on thoracic, 290; coarctation of aorta with; collective review, 307; posterior communicating, 334; symp-

tomless abdominal, 386; coarctation of aorta associated with, 437; of hepatic artery, 453; management of abdominal aorticoiliac, associated with occlusive arterial disease, 492; congenital, of aortic sinuses with cardioaortic fistula, 537; surgical significance of spontaneous intra-abdominal hemorrhage, 562; and multiple ectasias of branches of external carotid, 562; dissecting, of aorta, 563

Angioma, Arteriovenous, of brain, 21; treatment of, 427

Antibiotics, Effect of combinations of, on coagulase-positive staphylococci, 93; subconjunctival administration of soframycin in treatment of corneal infections, 111; influence of clorpactin WCS-90 on bacterial complications of surgery, 194; combinations of; antibacterial action of serum after ingestion of novobiocin or tetracycline or both, 195; bacterial wound complications after aseptic and conditionally aseptic operations, 393; incidence of circulating antibody to penicillin in penicillin hypersensitivity reactions, 394; drug usage and susceptibility of staphylococci to, 395; influence of, on spread of tumors of colon, 406; problem of management of nasal carriers of staphylococci, 499; puerperal mastitis in era of, 532; experience with amphotericin B, 566

Anticoagulants, New, G 25766, of indanedione series, with protracted action, 192; prophylactic use of, in postoperative patients, 287; role of fibrinolytic agents in thrombotic diseases, 387; for thrombophlebitis in lower extremities, 388

Antitrypsins, Acute pancreatitis; enzymatic toxemia and experimental trial of, 56

Antrum, Role of, in surgical treatment of peptic ulcer, 42

Anus, Some comments on surgical treatment of imperforate; long term results and postoperative management, 51; atresia of, combined with aganglionic megacolon, 150; treatment of anorectal malignant melanoma, 150; pathology and treatment of squamous cell carcinoma of anal canal and anal margin, 452; squamous cell carcinoma of anal canal and, 544

Aorta, Subisthmic aortic stenosis and occlusive disease, 34; coarctation of, in infants, 85; problems in surgical management of coarctation of, 85; chronic occlusion of, iliac arteries and, 188; rupture of, after blunt thoracic trauma, 189; grafts of polyurethane in, of dogs, 189; elastic properties of intima, media, and adventitia of human, 285; coarctation of, with aneurysm; collective review, 307; symptomless abdominal aneurysm, 386; coarctation of, associated with aneurysm, 437; experimental replacement of arch of, by homografts, 492; indications and contraindications for various methods of abdominal aortography, 493; congenital aneurysms of aortic sinuses with cardioaortic fistula, 537; dissecting aneurysm of, 563; acute renal insufficiency following surgery of, 563

Aortic valve, Aortic valvuloplasty under direct vision, 133; congenital bicuspid, 238; congenital bicuspid, in elderly, 238; anatomic variations in 46 patients with congenital stenosis of, 238; ejection time in stenosis of mitral valve and, 346; surgical relief of aortic insufficiency by direct operation on, 348; open operation in treatment of calcific stenosis of, 348; surgical treatment of stenotic, 492

Apparatus, Methods for measurement of blood flow, 103; improved sump suction drain for management of gastric and intestinal fistulas, 198; vacuum extractor, 269; clinical experiences with photocoagulator, 329; use of vacuum extractor (ventouse) in obstetrics, 472; clinical experiences with new plethysmograph, 502; method of controlled oxygen administration which reduces risk of carbon dioxide retention, 502

Appendicitis, Sterility, and hysterosalpingography, 47; and pregnancy, 369; acute, in pregnancy, 467; during pregnancy, 467; acute, with perforation, 543

Arfonad, Effect of, on monkey, 96

Arm, Fractures of forearm in adults, 486; flexor tendon ruptures in forearm and hand, 559

Arteries, Indications for and results of metatarsal amputation in gangrene of arterial origin, 83; embolectomy of superior mesenteric, 86; coronary arteriography, 99; local spasm in cerebral, 122; deep tissue temperatures and blood circulatory velocities in lower extremities of patients with obliterative disease of, 4 years after lumbar gangliectomy, 124; comparison of ligation of internal mammary, and sham operation for angina pectoris, 133; chronic occlusion of aorta and iliac, 188; circulation in lower limb before and after reconstruction of obstructed main, 190; spontaneous occlusions of upper extremity, 190; aberrant left pulmonary, 230; coronary arteriography, 236; surgical correction of main pulmonary, 237; acute ischemia in limb injuries, 285; ligation of both internal carotids, 285; surgical experience with 220 acute injuries of, in civilian practice, 285; central, of retina, 328; coronary arteriography by means of acetylcholine, 345; myoglobinuria after acute occlusion of, 386; symmetrical gangrene associated with coronary thrombosis, 387; brachial vertebral angiography, 401; organization of small, of hand and digits, 491; evaluation of ophthalmodynamometric and angiographic findings in patients with thromboses of internal carotid, 491; management of abdominal aorticoiliac aneurysms associated with occlusive disease of, 492; serial femoral arteriography in occlusive disease, 492; replacement of main pulmonary, bifurcation by autogenous pericardium, 493; ligation of superior mesenteric artery at different levels, 493; reconstruction of, in arteriosclerosis obliterans of lower extremities, 494; reconstructive surgery in occlusion of peripheral, 494; diagnosis and treatment of stenosis of renal, 562; multiple ectasias and aneurysms of branches of external carotid, 562; angiography of internal carotid with use of catheter technique, 571

Arthritis, Acute suppurative, of hip in neonatal period, 80

Ascites, Role of lymphatics in accumulation of ascitic fluid, 191

Asthma, Surgery in patients with, 292

Bacteria, Study of relationship of normal bactericidal activity of human serum to infection, 94; survival of strains of enteric bacilli in blood stream as related to their sensitivity to bactericidal effect of serum, 94; enterobacillary septicemia and bacterial shock in septic abortion, 165

Barbiturate, Methohexital sodium, new ultrashort-acting, 97

Bile duct, Duodenal ulcer and high implantation of common, 41; primary closure of common, 53; investigation of sphincter of Oddi with aid of drugs, 54; groove of common, in pancreas, 55; duodenal diverticula in region of sphincter of Oddi and diseases of terminal common, 55; hepatocholangiojejunostomy Roux en Y, alternate method of repair of strictures of, 56; primary carcinoma of cystic duct, 153; congenital atresia of, 154; anatomy and pathology of terminal common, with special reference to stenosis of sphincter of Oddi, 155; evaluation of common channel as factor in pancreatic or biliary disease, 155; surgical injuries of, 255; surgery of common, 361; disease of papilla of Vater, 362; structure of papilla of Vater and its functional significance in normal and diseased states, 363; operative injuries to, 454; 454; percutaneous transhepatic cholangiography, 505; intravenous cholangiography with sodium iodopamide, problem of nonvisualization. 505

Biliary tract, Cholelithiasis and biliary dystonia; follow-up after gallbladder operations in 1949 to 1955, 53; operative measurement of biliary flow; test of function of sphincter of Oddi, 55; choledochoduodenostomy, 153; myocardial circulation and, experimental observations using electropolarograph, 154; spontaneous biliary fistula, 154; evaluation of common channel as factor in pancreatic disease or disease of, 155; lithiasis in, after partial gastrectomy for gastroduodenal ulcers, 254; choledochoscopy versus cholangiography, 254; present status of surgery of, 255; leukemoid reaction and intermittent Charcot's fever as clinical syndrome in carcinomatous obstruction of, and liver metastases, 361; combined secretin and cytology test in diagnosis of cancer of pancreas and, 362; recognition of internal spontaneous biliary fistulas, 453; intravenous cholangiography in disease of, 454; duodenopancreatic syndromes associated with disease of, revealed by cholangiomanometric studies, 455; secondary procedures on, 455; calibrated papillosphincterotomy, 459; peroperative cholangiography and problems of visualization and treatment of stones and strictures in, 545; an approach to operations on, 545; biliobiliary fistulas, 545

Biopsy, Open lung, for diffuse pulmonary lesions, 30; diagnostic conization of cervix; analysis of 235 operations, 60; of normal intestine, 145; needle, of pleura, 229; technique to increase value of cone, from cervix, 260

Bladder, Vesical diverticula in childhood, 73; partial denervation of; new operation for treatment of urge incontinence and similar conditions in women, 75; study of ileal substitution for creation of continent urinary, 75; treatment of papillomas of, with radioactive colloidal gold (Au^{198}), 75; papilloma of, 173; vesicoureteral regurgitation in children, 173; partial cystectomy in malignant tumors of, 173; total cystectomy for tumors of, 174; recurrence of tumors of, 174; colocystoplasty using colonic section as flat graft, 176; rupture of, in newborn, 271; effect of muscle relaxants on function of, 277; neurogenic, in general hospital, 277; residual urine in rehabilitation of, 278; amino tumors of, 278; use of 5-fluorouracil in treatment of carcinomas of, 278; carcinoma of, 278; chemotherapy of carcinoma of, 305; vesicocolic fistula, 357; vaginal closure of posthysterectomy vesicovaginal fistulas, 367; comparative study of vesicovaginal fistulas following delivery, 371; management of, in congenital spinal cord lesions, 378; cystosphincterometry in investigation of problems of micturition, 378; pheochromocytoma of urinary, 378; disturbances of function of, in relation to pregnancy, 467; exstrophy of, 479; surgical treatment of cancer of, 479; surgical treatment of tumors of, 479; complications of irradiation of tumors of, 480

Blood, Neonatal purpura with platelet isoantibody in maternal serum, 70; influence of Rh isoimmunization on neonatal mortality, 70; study of injection of, intraperitoneally into women, 89; survival of strains of enteric bacilli in blood stream as related to their sensitivity to bactericidal effect of serum, 94; induced hypothermia and intravascular aggregation, 95; methods for measurement of flow of, 103; red cell fragility after severe craniocerebral injury, 121; evaluation of slope-volume method as index of, in lungs, 129; observations on blood group distribution in peptic ulcer and gastric cancer, 139; effects of experimental splenectomy on erythrocyte regeneration, leucocyte regulation, and hemorrhagic shock, 157; new anticoagulant, G 25766, of indanedione series, with protracted action, 192; postoperative changes in coagulation of, in elderly patients, 192; fetal erythrocytes present in maternal circulation before and after delivery, 263; ABO blood groups and cancer of esophagus, cancer of pancreas, and pituitary adenoma, 286; blood groups of gastric ulcer and carcinoma, 286; toxic marrow failure treated by homograft of fetal hemopoietic tissue, 304; treatment of corneal abrasion with topical whole, 328; plasma fibrinogen levels and erythrocyte sedimentation rates in neurosurgical patients, 334; sedimentation rate of, and diagnosis and prognosis of carcinoma of cervix, 366; fetal disease and erythroblastemia, 371; studies of inhibition of plasmin plasminogen fibrinolytic enzyme system in patients with myocardial infarction, 388; fibrinolytic system and use of fibrinolysin in myocardial infarction, 389; studies of plasmin-plasminogen system in thromboembolic diseases, 389

Blood, circulation, Operations on blood vessels necessitated by poor, of extremities, 88; in lower limb before and after reconstruction of obstructed main artery, 190; changes in, due to open pneumothorax in surgical patients, 230; importance of afferent, in structure and function of liver, 302; cerebral peripheral circulatory action of nylidrin hydrochloride, 386; bilateral adrenalectomy in treatment of thromboangiitis obliterans, 482

Blood, extracorporeal circulation, Performance of stationary vertical screen oxygenator (Mayo-Gibbon), 196; experimental studies with, as method to enable surgical attack on thoracic aneurysms, 290; rotating disc blood oxygenator and integral heat exchanger of improved inherent efficiency, 290; effect of 2 per cent carbon dioxide on pH and pCO_2 during, 291; potassium ion as cardioplegic agent in total cardiac bypass and during hypothermia with coronary perfusion, 291; venoarterial pumping, proposed technique for relief of cardiac stress, 347; simple heart-lung machine with new film-oxygenator, 388; design and use of pump oxygenator, 396; renal and portal blood flow under normothermic and hypothermic conditions during, 397; with hypothermia, 397; cerebral embolism by antifoam A in bubble oxygenator system, 397; influence of anesthetic technique on oxygen consumption during total cardiopulmonary bypass, 397; cyanosis following cardiopulmonary bypass, 398; complications after intracardiac surgery with aid of, 398; selective hypothermia of myocardium in open heart surgery with, 499; high output bubble oxygenator with variable oxygenation chamber for cardiac bypass, 500; surgical treatment of pulmonary stenosis using, 537; an effective blood heat exchanger for deep hypothermia in association with extracorporeal circulation but excluding the oxygenator, 567; open heart surgery without need for donor blood priming in pump oxygenator, 567

Blood transfusion, Reactions from; their causes and identification, 89; dialysis of citrate blood for transfusion, 191; replacement of blood loss during surgical procedures with blood collected in citrate phosphate dextrose solution, 191; intra-aortic transfusion of oxygenated blood and endotracheal insufflation of oxygen in resuscitation of severely anoxic newborn lambs, 271; exchange transfusions in newborn using fresh heparinized blood, 271; safer transfusions through appreciation of variants in blood group antigens in Negro and white blood donors, 286; legal aspects of transfusion therapy, 389; kidney damage resulting from reactions due to, 390; and hemorrhage as major cause of cardiac arrest, 495; blood donor, 495; exchange transfusion in cases of acquired acute hemolytic anemia, 496; arteriography of renal circulation after transfusion of incompatible blood, 507

Blood vessels, Diagnostic and therapeutic problems of brachiocephalic aneurysms, 85; strip graft technique, 86; hemodynamics of vascular transplants, 86; superi-

or mesenteric artery embolectomy, 86; improvement of results of embolectomy for arterial embolism, 86; study of recurrent pulmonary embolism, 87; renovascular hypertension treated by thromboendarterectomy, 87; arterial perfusion in lower limb as aid to surgery of, 88; operations on, necessitated by poor circulation of extremities, 88; congenital coronary arteriovenous fistula, 132; results of tenotomy of tendo Achillis in intermittent claudication, 185; value of peripheral arteriography in assessing acute injuries of, 187; prevailing interstitial pressures in lower limbs, 187; changes in foot volume and capillary fragility during continuous cold exposure and starvation, 187; two-piece intraluminal shunt, experimental study, 187; transplantation of big vessels with aid of removable metallic prosthesis, 187; conservation of, using new synthetic material, 188; effect of whole body radiation and infection on arterial replacement, 188; occlusive disease of branches of aortic arch, 180; recurrent macroembolism and microembolism in cases of peripheral venous thromboses, 191; elastic properties of human aortic intima, media, and adventitia, 285; acute ischemia in limb injuries, 285; late effect of lumbar sympathectomy on blood flow in foot in obliterative vascular disease, 338; angiography, 385; intravascular electronic measurements of pulse pressure in obstructive arteriopathy, 385; arteriosclerosis obliterans, 385; cerebral peripheral circulatory action of nylidrin hydrochloride, 386; vascular reaction of tubular bone to ischemia in peripheral occlusive vascular disease, 387; renal revascularization for hypertension, 491; response of veins and arterioles of forearm to walking during acclimatization to heat in man, 491; vertebral venous system of dog, 491; clinical experiences with new plethysmograph, 502; left ventricular and systemic arterial catheterization, 503; place of lumbar sympathectomy in arteritis obliterans of lower limbs, 530; acute vascular trauma, 561; arteriovenous fistulas of hand, 561; surgical therapy of arterial hypertension, 561; experimental development of alloplastic vascular prostheses and their clinical use, 561; percutaneous use of hydrogen peroxide for treatment of peripheral vascular disturbances, 563; amputations of lower extremity in emergency surgery, 564

Bone, Effect of gonadal steroids on, and their use in treatment of fractures; collective review, 1; vascular anatomy of spine and its relationship to pyogenic vertebral osteomyelitis, 78; biophysical investigations of mineral phase in healing fractures, 77; covering of large defects of skull with refrigerated transplants of, 177; transplantation of, 183; osteoblastic metastasis of, in gastrointestinal and bronchial carcinoids, 281; follow-up of 22 cases of surgically treated old fractures and pseudarthroses of navicular, of hand, 282; polyurethane polymer, ostamer; its use in fractures and diseased, 379; some observations on reaction of tendon and, after tunneling of, and insertion of tendon, 384; vascular reaction of tubular, to ischemia in peripheral occlusive vascular disease, 387; roentgenographic evidence of changes in, after injuries by electric current, 403; aneurysmal cysts of, 483; 5 year cure in case of malignant hemangioendothelioma of, treated with roentgen rays, 483; acute hematogenous osteomyelitis, 483; hematogenous pyogenic vertebral osteomyelitis, 484; pyogenic osteomyelitis and arthritis of spine treated with combinations of antibiotics and gamma globulin, 484; grafting with anorganic, 484; marrow embolism and intraosseous contrast radiography, 504; formation of, in laparotomy scars, 555; grafts of deproteinized animal, 555; 10 cases of giant cell tumor, 555; sarcoma in Paget's disease of, 555

Bone marrow, Technique of transplantation of, in man, 203; some observations on treatment of postirradiation hematopoietic depression in man by infusion of stored autogenous, 204; toxic marrow failure treated by homograft of fetal hemopoietic tissue, 304; embolism of, and intraosseous contrast radiography, 504; irradiation and transplantation of, 510

Brain, Arteriovenous angiomas of, 21; acute extradural hematomas without demonstrable skull fractures, 21; pathogenesis and natural history of intracranial aneurysms, 21; tumors of temporal lobe, study of 100 cases, 22; significance of individual variation in diencephalon and globus pallidus in stereotactic surgery of human, 22; repair of dural defects by graft; analysis of 540 penetrating wounds of, incurred in Korean War, 121; subarachnoid hemorrhage in army, 1950 to 1956, 121; red cell fragility after severe craniocerebral injury, 121; intracranial abscesses, 122; local spasm in cerebral arteries, 122; sensitivity of tumors of, to radiation and late radiation necrosis of, 122; pontine angle tumor, 219; bilateral studies of cerebral oxygen uptake in young and aged normal subjects and in patients with organic dementia, 219; new surgical approach to saccular aneurysms of, 219; rupture of congenital intracranial aneurysm in pregnancy, 219; particular angiographic sign in meningiomas of tentorium; artery of Bernasconi and Cassinari, 219; microangiomas of, 220; disease of, in stillborn infants and neonates, 270; angiography of, in diagnosis of acute stroke, 333; fat embolism of, in differential diagnosis with other posttraumatic lesions of, 333; practitioner and craniocerebral injuries, 333; abscess of, 333; prognosis in subarachnoid hemorrhage, 334; posterior communicating aneurysms, 334; use of urea in intracranial surgery, 334; parasagittal meningiomas of the longitudinal sinus and phalanx, 335; technique of stereotactic surgery, 335; stereotaxic treatment of deep intracerebral vascular malformations, 336; severe hypertonicity of extracellular fluid associated with lesions of, 391; some radiologic aspects of ischemia of, 401; roentgenologic diagnosis of tumors of corpus callosum, 401; subarachnoid cisterns, 401; vertebral angiography in tumors of posterior fossa, 425; mental abnormalities following subdural hematoma, 425; chemopallidectomy as treatment for Parkinson's disease, 425; roentgen diagnosis of intracranial incisural space-occupying lesions, 525; reduction of intracranial pressure with hypertonic urea, 525; "third day crisis" in surgery of, 525; surgical treatment of spontaneous cerebrospinal rhinorrhea, 525; effect of cutting tentorium cerebelli on response to craniocerebral trauma, 525; heroic treatment of acute head injuries, 526; subdural hematoma, 526; metastatic tumors of, 527; primary tumors of cerebellum, 527; surgical application of high intensity focused ultrasound; selective focal destruction of central nervous system, 528; electroencephalographic changes due to anoxia of, in rabbits, 573

Breast, Hypophysectomy in treatment of cancer of, 23; hypophysectomy in inoperable cancer of, 23; reconstruction of, with local derma and fat pedicle flaps, 26; transsternal phlebography of internal mammary veins, 26; progress of metastatic carcinoma of choroid secondary to neoplasms of, 112; gynecomastia of pulmonary tuberculosis, 126; Hodgkin's disease of, 126; carcinoma of, associated with pregnancy or lactation, 127; cancer of, in women 30 years old or less, 127; cancer of, detected by routine physical examination, 127; incorporation of formate-C^{14} into cancer in vitro of human, 127; treatment of advanced carcinoma of, by bilateral oophorectomy and prednisone, 128; treatment of metastasizing cancer of,

with oophorectomy and cortisone, 128; hypophysectomy in treatment of metastatic cancer of, 221; malignant gland in axilla, 223; inhibition of engorgement of, with endocrine substances and its possible role in prevention of puerperal abscess of, 225; significance of discharge from nipple in nonpuerperal conditions of, 225; phyllode or mixed tumors of, 225; validity of pathologic diagnosis of cancer of, 226; tissue culture as guide to hormone therapy and prognosis of carcinoma of, 226; etiology of abscess of, in puerperium, 340; epidemiology of cancer of, 340; statistical study of malignancies found before, during, or after routine plastic operations on, 341; roentgenography of giant fibroadenoma of, 341; prognostic value of group of biologic examinations for metastatic cancer of, 341; lymph nodes associated with carcinoma of, 341; hormone treatment of advanced cancer of, 341; urinary estrogens after endocrine ablation, 342; exogenous sex hormones and their relation to lifelong adaptations in women with metastatic cancer of, 342; ovarian metastasis of carcinoma of, 369; congenital absence of one, 428; excision of major duct system for benign disease of, 428; radical mastectomy with conservative anterior mediastinal node dissection, 428; shoulder and arm difficulties after radical mastectomy, 428; internal mammary lymph node biopsy as guide to postmastectomy radiation therapy in carcinoma of, 429; selection of patients with cancer of, for adrenalectomy or hypophysectomy, 429; therapeutic castration for advanced cancer of, 429; prophylactic bilateral adrenalectomy and oophorectomy for advanced cancer of, 430; hypophysial implantation of radioactive gold in treatment of cancer of, 528; puerperal mastitis in antibiotic era, 532; mammaplasty; report of new technique based on two-pedicle procedure, 533; management of inflammatory cancer of, 533; 82 cases of cancer of, treated exclusively with roentgen therapy, 533; adrenalectomy and hypophysectomy for advanced cancer of, 533; clinical effect of norandrostenolone phenylpropionate (durabolin) in patients with metastasizing cancer of, 534; sarcoma of, 534

Bronchus, Laminagraphy of chronic bronchitis and bronchiectasis with bronchographic and angiopneumographic control, 129; reactions in mucosa of; study based on analysis of 125 biopsies of mucosa of asthmatic and bronchiectatic patients, 343; delayed reconstruction of rupture of, 434; new means for closure of stump of, 434; radical surgical treatment of bronchiectatic disease, 434; bronchiectasis, clinical features and surgical treatment, 435; bronchiectasis, surgical treatment of bilateral disease, 435; bronchiectasis due to foreign bodies, 435; bronchiectasis; results of pulmonary resection, 436; production of carcinomas of, in mice, 436; cytologic diagnosis of carcinoma of, 436; neurofibromas of airways, 535

Burns, Tear gas, of eye, 214; albumin catabolism in, and following surgical procedures, 287; enzymatic treatment of deep, 288; management of, in children, 288; infection of, 288; rehabilitation of patients with deep, connected with recovery of function and sensation of grafted skin areas, 289; primary excision in third degree, 394; treatment of large, 394; evaluation of semiopen method in management of severe, after acute phase, 498; dextran therapy in severe, 498

Calcaneous, Isolated fracture of sustentaculum tali with dislocation of body of, to outside, 383

Calculi, Recent experiences with spontaneously disappearing gallstones, 53; urinary lithiasis in children, 74; statistical analysis of ureteral, 276; recurrent renal, treated by plastic operation utilizing intestinal segments, 276; partial nephrectomy in calyceal lithiasis, 376; clinical use of renacidin in urinary calcifications, 554

Cancer, Reparative surgery of head and neck, 15; diagnosis of thyroid, 18; hyperfunctioning, of thyroid gland, 19; operative wound seeding with tumor cells; its role in recurrence of head and neck, 20; hypophysectomy in treatment of breast, 23; hypophysectomy in inoperable, of breast, 23; preoperative and postoperative mediastinal infiltration with suspension of radioactive chromium phosphate in treatment of bronchogenic, 32; evaluation of roentgen therapy in management of nonresectable lung, 33; primary lung; follow-up study, 33; 5 year follow-up of roentgenographically detected lung, 33; preoperative irradiation for esophageal, 38; carcinoma in situ and small, of stomach, 44; statistical study of 324 cases of operable gastric, 44; surgery of, of colon, 50; rationale of re-resection for recurrent colonic and rectal, 50; primary liver, in infancy and childhood, 53; diabetes mellitus and pancreatic, 57; diagnostic conization of cervix; analysis of 235 operations, 60; exfoliative cytology during pregnancy for detection of cervical, 60; area of cervix involved by carcinoma in situ and anaplasia (atypical hyperplasia), 60; of cervix in South Viet-Nam, 60; of cervix uteri; treatment by supervoltage irradiation only, 61; interstitial radioactive colloidal gold therapy of lateral pelvic nodes in cervical, 61; early recognition of radioresistant carcinoma of collum uteri, 61; value of surgery in treatment of, of corpus uteri, 61; primary, of fallopian tube, 62; clinicostatistical and heredopathogenetic findings in ovarian, 62; of ovary, 63; primary, of vulva with special reference to leucoplakia, 63; mortality among women in 3 Catholic religious orders with special reference to, 102; progress of metastatic, of choroid secondary to mammary neoplasm, 112; analysis of sites and causes of treatment failures in squamous cell, of oral cavity, 115; end results and causes of failure in treatment of intraoral, 115; evaluation of failures in treatment of oral, 116; observations on "sentinel node" on parotid, 117; evaluation of radical neck dissections and jaw dissections, 120; basal cell, in children and young adults, 125; incorporation of formate-C^{14} into in vitro human breast, 127; of breast detected by routine physical examination, 127; of breast in women 30 years old or less, 127; of breast associated with pregnancy or lactation, 127; treatment of advanced breast, by bilateral oophorectomy and prednisone, 128; treatment of metastasizing breast, with oophorectomy and cortisone, 128; 5 year survey of results of cytologic examination for lung, 131; of lung, 131; results of surgical treatment of bronchogenic, 131; contralateral pneumothorax after pneumonectomy for, 132; of esophagus treated by excision, 135; of esophagus with atypical symptoms at onset, 135; observations on blood group distribution in peptic ulcer and gastric, 139; cytologic diagnosis of gastric, and evaluation of abrasive brush technique in 125 cases, 141; of stomach, 141; of stomach in young adult, 141; topical acidity in comparison with uropepsin secretion in ulcer and, of stomach after stomach resection, 142; late development of gastric, after gastrectomy for malignant disease, 143; benign lesions of cecum simulating, 148; primary, of gallbladder, 152; primary, of cystic duct, 153; diagnostic value of determinations of serum leucine aminopeptidase concentrations in pancreatic, 156; anterior or total pelvic exenteration in advanced, of uterine cervix or rectum, 159; autoplastic transplantation of ovary in patients with cervical, 160; ultrastructure of, of vulva, 160; basal cell and basal-squamous cell, of vulva, 161; primary, of vagina, 161; cytology of prostate gland in

diagnosis of, 169; diagnosis of thyroid, with radioactive phosphorus, 202; role and action of environmental agents in pathogenesis of lung, 203; of antrum, 216; management of child with thyroid, 218; of thyroid in association with struma lymphomatosa, Hashimoto's disease, 218; hypophysectomy in treatment of metastatic mammary, 221; surgical and stereotaxic hypophysectomy for, 221; malignant gland in axilla, 223; validity of pathologic diagnosis of breast, 226; tissue culture as guide to hormone therapy and prognosis of mammary, 226; present position relating to lung, 235; bronchogenic; comparison of natural course and treatment with resection, x-radiation, and nitrogen mustard, 235; radical lobectomy, 236; atrophic gastritis as possible precursor of gastric, and pernicious anemia, 247; of stomach, 247; pancreatic and ampullary, 257; association of diabetes mellitus with primary, of pancreas, 258; cytologic prognosis in cervical, 260; radiation therapy for cervical, 260; surgical management of cervical, 260; statistical considerations on circumcision and cervical, 261; of vulva, 263; pregnancy after radical vulvectomy for vulval, 263; bilateral orchiectomy in treatment of prostatic, 273; of penis, 273; use of 5-fluorouracil in treatment of bladder, 278; of bladder, 278; blood groups of gastric ulcer and, 286; ABO blood groups and esophageal and pancreatic, and pituitary adenoma, 286; gastric; accuracy of radiologic diagnosis, 296; treatment of, of middle ear by 4 MV linear accelerator, 300; wedge filter approach with 4 MV radiation to treatment of alveolar and antral, 300; observations on effects of alkylating agents in human neoplastic disease, 303; spread of cells of, and its relationship to chemotherapy, 304; regional perfusion with cytotoxic agents, 304; effects of chemotherapeutic agents on human fetus, 305; chemotherapy of bladder, 305; survival rate in patients with laryngeal, 305; reappraisal of 75 cases of radical neck dissection for laryngeal, 332; epidemiology of breast, 340; statistical study of malignancies found before, during, or after routine breast plastic operations, 341; prognostic value of group of biologic examinations for metastatic breast, 341; lymph nodes associated with breast, 341; hormone treatment of advanced breast, 341; exogenous sex hormones and their relation to lifelong adaptations in women with metastatic breast, 342; urinary estrogens after endocrine ablation, 342; diagnostic efficacy of endobronchial aspiration, biopsy, and cytology of sputum in bronchopulmonary, 343; use of colon and other organs for reconstruction of esophagus in patients with, 349; blood sedimentation rate and diagnosis and prognosis of carcinoma of cervical, 366; carcinoma in situ of uterine cervix, 366; carcinoma in situ and dysplasia of cervix, 366; cervical; treatment by radical hysterectomy following central irradiation, 366; of collum during pregnancy, 367; ovarian metastasis of breast, 369; estrogen treated prostatic, 373; question of circumcision, 373; radioactive gold in management of ovarian, 404; radiation and leukemia in cervical, 404; production of, in mice and rats by chromium compounds, 405; effect of hyperthermia upon chemotherapy of; application to external, of head and face structures, 405; studies on abdominal organ perfusion for chemotherapy of, 406; clinical application of diphenylthiocarbazone (dithizone) in prostatic, 407; conference on intraoral, 420; statistical review of intraoral, 420; relationship of oral, to generalized connective tissue changes, 421; treatment of recurrent, of pharynx and cervical esophagus, 421; of larynx, pharynx, and upper cervical esophagus, 422; present day management of thyroid nodules and malignancy, 423; elective neck dissection for intraoral, 423; internal mammary lymph node biopsy as guide to postmastectomy radiation therapy in breast, 429; therapeutic castration for advanced mammary, 429; cytologic diagnosis of bronchial, 436; surgical treatment of, of lower third of esophagus, 440; surgical therapy of gastric, 446; perforation of colon in large bowel obstruction due to, 450; abdominopresacral resection for selected rectal lesions, 451; curability of rectal, 451; pathology and results of treatment of squamous cell, of anal canal and anal margin, 452; primary neoplasms of liver, 453; preoperative management in, of head of pancreas and of papilla, 459; palliative intervention for neoplasm of head of pancreas, 459; surgical treatment of, of head of pancreas and papilla of Vater, 459; prognostic factors in radioresistant cervical, 462; evaluation of results of cervical, treated by Mitra's technique, 462; surgical treatment of cervicouterine, 462; evaluation of lymphadenectomy in therapy of cervical, 462; of fallopian tube with special reference to yellow discharge which appears with it, 464; primary vaginal, 464; evaluation of prostatic serum and acid phosphatase in prostatic diseases, especially in prostatic, 475; surgical treatment of bladder, 479; chemotherapy of, 508; of thyroid, 524; management of inflammatory breast, 533; 82 cases of mammary, treated exclusively with roentgen therapy, 533; various operative methods in surgical treatment of gastric, 542; discussion on squamous cell, of anus and anal canal, 544; of pancreas, 545; occult invasive squamous, of cervix, 547; of prostate presenting as disease of rectum, 551; interstitial implantation of radium needles in treatment of penile, 552

Cancer, metastasis, Of malignant tumors to adrenal gland, 76; experimental studies of factors influencing hepatic, effect of cortisone and adrenalectomy, 253; priapism caused by metastasis to corpora cavernosum, 273; leukemoid reaction and intermittent Charcot's fever as clinical syndrome in carcinomatous biliary tract obstruction and liver, 361; role of thoracic duct in abdominal tumor, 388; an oral benign lesion progressing to epidermoid carcinoma with metastasis to lung, 524; analgesic action of hypophysectomy on, 528; clinical effect of norandrostenolone phenylpropionate (durabolin) in metastasizing mammary cancer patients, 534

Cancer research, Experimental production of cancer with tobacco tar and heat, 203; production of bronchial carcinomas in mice, 436; relationships of immunology to, 507; studies on prevention of surgical implantation of cancer, 507; effect of snuff and tobacco on production of oral carcinoma, 507; effectiveness of chemotherapy in relation to extravascular invasion by embolic tumor cells, 573

Carcinoid, Tumors, 139; anesthetic significance of serotonin secreting tumors, 196; tumors of lung and, syndrome, 234; osteoblastic bone metastasis in gastrointestinal and bronchial, 281; gastrointestinal tumors, 297; histochemical reactions in tumors of human gastrointestinal tract, 355; malignant tumors of intestine, 356

Cardiospasm, Late results of Heller's operation for, 37

Carpal tunnel syndrome, 84; in pregnancy, 185; hydrocortisone and, 185; median nerve palsy as complication of acute pyogenic infections of hand, 560

Cataract, Effect of early ambulation on incidence of postoperative complications of surgery of, 112; combination of congenital, and cerebral palsy in brother and sister, 112; enzymatic zonulolysis, 214; chymotrypsin in surgery of, 214; use of alpha chymotrypsin in surgery of, 418

Cecum, Benign lesions of, simulating carcinoma, 148

Cesarean section, Steroid narcosis for, 68; spinal anesthesia for, 69; in diabetics, 69; infant in, 69; 167; Pfannenstiel incision in abdominal, 167; anesthesia in, 292; problem of delivery after previous, 470; on dead and moribund, 471
Chemotherapy, Transplantable human tumors in experimental; comparison with animal tumor systems, 101; cystic cavitation following, of acute tuberculosis, 234; development of efficient, for renal tuberculosis, 275; observations on effects of alkylating agents in human neoplastic disease, 303; spread of cancer cells and its relationship to, 304; effects of agents for cancer, on human fetus, 305; of carcinoma of bladder, 305; inhibition of corneal vascularization by triethylene thiophosphoramide, 327; effect of hyperthermia upon cancer, 405; studies on abdominal organ perfusion for cancer, 406; clinical application of diphenylthiocarbazone (dithizone) in carcinoma of prostate, 407; of cancer, 508; regional, for cancer, 508; leakage factor in regional perfusion with agents for, 573; effectiveness of, in relation to extravascular invasion by embolic tumor cells, 573
Children, Sarcoma of head and neck in, 20; resection for pulmonary tuberculosis in infants and, 31; therapy of bleeding esophageal varices in, 38; inguinal hernia in pediatric patients, 39; subtotal gastrectomy for bleeding duodenal ulcer in, 41; primary carcinoma of liver in infants and, 53; vesical diverticula in, 73; urinary lithiasis in, 74; treatment of clubfeet in, between ages of 2 and 5 years, 84; tetanus in, 93; tetanus in African, 93; induction of anesthesia in young, 95; basal cell cancer in young adults and, 125; barium enema reduction for treatment of intussusception in, 147; vesicoureteral regurgitation in, 173; calculosis of urinary tract in, 174; fractures of proximal metaphysis of radius in childhood and in adolescence, 177; congenital dislocation of hip; studies in early walking group, 178; fractures of femur in, 180; parenteral fluid therapy for those undergoing major abdominal surgery, 193; fibrous dysplasia of mandible in, 216; management of thyroid carcinoma in, 218; pulmonary abscess in infants and, 233; abdominal tumors in infants and, 244; results with abdominal resection in Hirschsprung's disease, 251; polyps of colon in, 252; vaginal and uterine tumors in, 261; ovarian tumors in premenarchal, 261; ovarian neoplasms in, 261; ovarian tumors in, 262; management of burns in, 288; review of management of intussusception in pediatric center, 1938 to 1958, 356; lymphangioma in infants and, 388; lesions of vertebral column in tetanus in, 395; prolapse of gastric mucosa of pylorus in, 444; temporary gastrostomy in pediatric surgery, 445; adenomas of colon and rectum in, 451; hyperthermia after surgical operation in infants and, 498; splenoportography in, 504; neoplasia following therapeutic irradiation for benign conditions in, 506; experiences with surgical treatment of inguinal hernia in, 541; overwhelming infection in, following splenectomy, 546; closed wire fixation of supracondylar fractures in, 556; an evaluation of drugs used for oral premedication of, 565
Chromium, Production of cancers in mice and rats by compounds of, 405
Chymotrypsin, In cataract surgery, 214; enzymatic zonulolysis, 214; various laboratory aspects of alpha, 329; use of alpha, in cataract surgery, 418
Cirrhosis, Splenectomy and splenic artery ligation in treatment of ascites associated with, 158; thyroiditis and liver, 360; portacaval shunt operation in patients with ascites and, 453
Clavicle, Fracture of, 485
Cleft lip, Revision of nostril in, 331; surgical approaches to problem of bilateral, 331
Cleft palate, Problems of surgical repair of, 331; correction of deformity in adult patient with, 420
Cold, Changes in foot volume and capillary fragility during continuous exposure to starvation and, 187
Colitis, Toxic dilatation of colon in course of ulcerative, 49; rehabilitation and long term survival after colectomy for ulcerative, 49; emergency cecostomy in ulcerative, with acute toxic dilatation, 149; histopathology of chronic ulcerative, and its pathogenic implications, 149; sexual function following surgery for ulcerative, 149; immediate and late results of anal ileostomy after total proctocolectomy for ulcerative, 150; segmental (ulcerative), 252; right sided or segmental ulcerative, 358; treatment of ulcerative, 358; ulcerative, in older age patients, 450; gangrenous skin lesions associated with chronic ulcerative, 531; corticosteroids in preoperative medical management of ulcerative, 565
Collective review, Effect of gonadal steroids on bone and their use in treatment of fractures, 1; methods for measurement of blood flow, 103; surgical management of retinal detachment, 205; coarctation of aorta with aneurysm, 307; brachial palsy at birth, 409; soft tissue injuries of cervical region, 511
Colon, Surgery of cancer of, 50; rationale of re-resection for recurrent cancer of rectum and, 50; gastrostomy in surgery of, 148; diverticular disease of, with hemorrhage, 148; bleeding in diverticular disease of, 149; spontaneous rupture of normal, 149; colocystoplasty using section of, as flat graft, 176; diverticulitis of, 251; results with abdominal resection in Hirschsprung's disease, 251; physiopathogenetic interpretation of volvulus of, 251; submucous lipoma of, 252; polyps of, in childhood, 252; subtotal colectomy with anal ileostomy, 253; vesicocolic fistula, 357; surgical treatment of 20 patients with gross hemorrhage from presumed diverticular disease of, 358; perforations of, 358; abdominoperineal amputation with perineal colostomy, 359; influence of antibiotics on spread of tumors of, 406; irritable, and gallbladder disease, 449; juvenile polyps of, 449; diverticular disease of, 449; role of intestinal antisepsis in preoperative preparation of, 450; endometriosis of, 450; perforation of, in large bowel obstruction due to carcinoma, 450; subtotal colectomy with cecorectal anastomosis for multiple adenomas of colorectum, 451; adenomas of rectum and, in children, 451; diagnostic accuracy of barium enema study in carcinoma of rectum and, 505
Cornea, Immunochemical analysis of experimental transplants of, 328; treatment of abrasion of, with topical whole blood, 328; long term preservation of donor tissues for grafting of, 328
Cortisone, And its derivatives in treatment of sterility, 67; repair of experimental fractures under action of growth hormone, thyrotropin, and, 77; therapy with, for acute necrotizing pancreatitis, 257
Cranium, Practitioner and craniocerebral injuries, 333
Crohn's disease, Surgical management of, 250
Cysts, Evaluation of pancreatic, treated at Johns Hopkins Hospital, 56; large parameniscal, of knee with relation to cystic changes of menisci, 82; 3 new cases of intrapulmonary, 130; intrathoracic reduplication, 349
Cytology, Exfoliative, during pregnancy for detection of carcinoma of cervix, 60; colpocytologic study in cases of threatened abortion during first trimester of pregnancy, 164; of vagina as guide to treatment of habitual abortion, 164; of prostate gland in diagnosis of cancer, 169; diagnosis of bronchial carcinoma by, 436; gastric lesions including exfoliative, 444; diagnosis of prostatic tumors by transrectal aspiration biopsy, 475; value of gastric, in diagnosis of benign affections of stomach, 542

DECUBITUS ULCERS, Management of, 92
Dehydration, Failure in temperature regulation during progressive, 302
Dextran, Therapy with, in severe burns, 498
Diabetes insipidus, After trauma, 121
Diabetes mellitus, And carcinoma of pancreas, 57; cesarean section in, 69; association of, with primary carcinoma of pancreas, 258; perinatal mortality of infants of mothers with, 468
Diagnosis, Bronchoscopy performed under general anesthesia plus artificial respiratory paralysis, 29; cytologic, of gastric cancer and evaluation of abrasive brush technique in 125 cases, 141; of gastrointestinal bleeding site by use of radiochromate tagged red cells, 144; hormocytogram, synthesis of endocrinologic gynecologic explorations, 159; frozen sections, 293; diagnostic efficacy of endobronchial aspiration, biopsy, and cytology of sputum in bronchopulmonary carcinoma, 343; study of portal venous system, 360; value of routine cytologic smears in pregnancy, 369; supersonic investigations in heart sounds and mitral stenosis, 437; laparoscopic, of hemoperitoneum caused by traumatic rupture of spleen, 546
Diaphragm, Incarcerated and obstructed hernia of, 242; eventration of, 136; subdiaphragmatic inflammatory processes, 350; complications of subphrenic abscess, 351; strangulated hernia of, 442; postoperative hernia of, 540
Digits, Cross-finger flaps in injuries of, with notes on Kirschner wire fixation, 340
Diverticulitis, Surgical treatment of sigmoid, 50; of colon, 251
Diverticulum, Rare complications of Meckel's, 48; vesical, in childhood, 73; surgical treatment of pulsion, of hypopharynx, 116; of colon with hemorrhage, 148; bleeding in, of colon, 149; of female urethra, 279; surgical treatment of duodenal, 352; esophageal, 438; diverticular disease of colon, 449; Meckel's 543
Dumping syndrome, Factors responsible for symptoms, cause of syndrome, and rationale of its treatment, 46; conversion of Billroth II to Billroth I gastrectomy for severe, 248; study of role of pylorus in prevention of, 353; electrogastrogram in postgastrectomy patients, 353; after partial gastrectomy for duodenal ulcer, 353
Duodenum, Ulcer of, and high implantation of common bile duct; problems attending their association, 41; comparative evaluation of treatment of perforated ulcers of stomach and, 43; diverticula of, in region of sphincter of Oddi and diseases of terminal common bile duct, 55; ulcers of second portion of, 140; segmental gastrectomy with innervated antrum for ulcer of, 141; Polya gastrectomy with Y anastomosis in treatment of ulcer of, 142; occlusion of, in newborn and in infancy, 144; big, 248; intestinal malrotation and ileus of, 249; surgical treatment of diverticula of, 352; new technique for closure of stump of, after Billroth II gastrectomy, 352; vagotomy and small resection in treatment of ulcer of, 446; prolapse of gastric mucosa into, 504
Dupuytren's contracture, 223
Dura, Cold-preserved homografts of, used in injuries to cranial vault, 121; repair of defects of, by graft; analysis of 540 penetrating wounds of brain incurred in Korean War, 121

EAR, Indications for tympanoplasty, 113; ossicular repositioning and ossicular prostheses in tympanoplasty, 113; statistical review of 177 tympanoplasties performed in 1957 and 1958, 113; myringoplasty, 114; surgical significance of stapedial and labyrinthine anatomy, 114; new technique in stapes mobilization, 114; oval window and round window surgery in extensive otosclerosis, preliminary report, 114; surgical treatment of malignant tumors of temporal bone and, 114; mobilization of stapes in older patients with otosclerosis, 215; problem of outstanding, 224; treatment of carcinoma of middle, by 4 MV linear accelerator, 300; results of 939 stapes mobilization operations, 330; some unsolved problems of stapes mobilization, 330; advantages of endotracheal anesthesia in surgery of nose, throat, and, 399; tympanoplasty, 419; management of lesions of middle, simulating otosclerosis, 419; stapedectomy, 419; vein plug stapedioplasty for hearing impairment due to otosclerosis, 419; surgical treatment of otosclerosis, 419; tissue reaction following reconstruction of oval window in experimental animals, 523; stapedoplasty, 523
Eclampsia, Management of, 468
Elbow, Atraumatic reduction of dislocations of, 556
Electrolytes, Different concept of volume replacement in traumatic hypovolemia, 391; severe hypertonicity of extracellular fluid associated with cerebral lesions, 391
Embolism, Pulmonary, and thrombosis of right side of heart, 31; clinical forms of amniotic, 65; superior mesenteric artery embolectomy, 86; improvement of results of embolectomy for arterial, 86; study of recurrent pulmonary, 87; recurrent macroembolism and microembolism in cases of peripheral venous thromboses, 191; thromboembolism and body weight, 388; cerebral, by antifoam A in bubble oxygenator system, 397
Emergency treatment, Cart for, in modern hospital, 294
Emphysema, pulmonary, Problem in diagnosis, 231; preoperative and postoperative cardiopulmonary dynamics of emphysematous bulla, 232; unilateral, 344; indirect estimation of arterial CO_2 tension in, 345; congenital localized pulmonary, and tension cysts of lungs in infants and children, 345
Endometrium, Hormonal response of, in endometriotic implants and its relationship to symptomatology, 365; endometriosis of colon, 450
Enzymes, Treatment of deep burns with, 288; influence of surgical operations on ferment activity of, 302; development of new fibrinolytic; use in surgical lesions, 393; use of alpha chymotrypsin in cataract surgery, 418; clinical experience and experimental observations with alpha chymotrypsin, 418; serum glutamic oxalacetic transaminase levels in 266 surgical patients, 497; effects of proteolytic, on human serum, 565
Epiphysis, Results of Blount's epiphysiodeses, 382; pathology of slipped upper femoral, 487; treatment of slipped upper femoral, 487
Esophagus, Tracheoesophageal fistula and atresia of, 28; plastic prostheses for trachea and, 28; late results of Heller's operation for cardiospasm, 37; ulcer of, 37; polyp of, 37; therapy of bleeding varices of, in children, 38; preoperative irradiation for cancer of, 38; esophagitis following total gastrectomy, 46; experimental studies on antethoracic reconstruction of, by utilization of jejunal loop transplanted into pectoral muscle, with especial reference to blood circulation in loop, 134; closing mechanism at gastroesophageal junction, 135; carcinoma of, treated by excision, 135; cancer of, with atypical symptoms at onset, 135; transthoracic fundoplication for management of special forms of reflux esophagitis, 241; cervical phase of antethoracic reconstruction of, utilizing terminal ileum and ascending colon, 241; diagnosis and treatment of hemorrhage from, 245; treatment of esophagothoracic fistulas, 348; use of colon and other organs for reconstruction of, in patients with cancer, 349; perforated, acute emergency, 349; cancer of larynx, pharynx, and upper cervical, 422; diverticula of, 438; fistulas of, as complication

of extrapleural pneumothorax, 439; alimentary obstruction of, 439; evaluation of modified Heller operation in treatment of achalasia of, 439; recognition and treatment of perforations of, 440; surgical treatment of perforation of, 440; surgical treatment of carcinoma of lower third, 440; intrapleural reconstruction of, with small and large intestine, 441; hiatal hernia with esophagitis, 442; use of vasopressin (pitressin) in control of bleeding from varices of, 539

Estriol, Excretion of, in intrauterine fetal death, 163; further studies on urinary excretion of, during pregnancy and its significance for estimation of placental function and dysfunction in advanced pregnancy, 163

Experimentation, Fluorescence optical visualization of complement binding and its use in histoimmunologic investigations of experimental renal anaphylaxis, 101

Eye, Shortening of angle of anterior chamber in angle closure glaucoma, 16; diagnosis and treatment of simple glaucoma, 16; lamellar keratoplasty, 16; subconjunctival administration of soframycin in treatment of corneal infections, 111; stenosis of aqueduct of Sylvius, 111; malignant melanoma of uvea, 111; report of unusual self-inflicted injury of, 111; progress of metastatic carcinoma of choroid secondary to mammary neoplasm, 112; surgical management of retinal detachment; collective review, 205; tear gas burns of, 214; correction of uniocular aphakia by means of all-acrylic anterior chamber implants, 214; chymotrypsin in cataract surgery, 214; peripheral iridectomy in closed angle glaucoma, 215; ophthalmologic significance of fractures of skull, 215; hazard of anesthesia in surgery of, 292; dumbbell-shaped dermoid cysts of orbit, 327; nonperforating injuries of, with hyphema, 327; surgery and strontium 90 in treatment of pterygium, 327; inhibition of corneal vascularization by triethylene thiophosphoramide, 327; treatment of corneal abrasion with topical whole blood, 328; serial recordings of depth of anterior chamber, 328; clinical experiences with photocoagulator, 329; various laboratory aspects of alpha chymotrypsin, 329; immediate skin grafting after orbital or orbital-sinus exenteration for malignant tumors, 329; ocular manifestations of thyrotoxicosis and thyrotropic or progressive exophthalmos, 330; bacteriophage typing of Staphylococcus aureus, 330; ocular complications of transsphenoidal yttrium 90 hypophysectomy, 336; hemangioma of choroid, 417; collection, storage, and selection of human vitreous for use in retinal detachment surgery, 417; clinical experience and experimental observations with alpha chymotrypsin, 418; iridocorneosclerectomy for glaucoma, 418; surgical results in acute glaucoma, 418

Eyelid, Anatomy of lower, and its relation to cause and cure of entropion, 17; marginal (tarsal) ectropion, 213; blepharophimosis and its operation, 417

Face, Study of 382 fractures of cheek bone, 15; surgical repair versus expectant treatment in traumatic facial palsy, 213; early management of maxillofacial mass casualties, 213

Fallopian tube, Primary carcinoma of; with report of 12 new cases, 62; pregnancy after tuberculosis of, 62; conservative surgery of, 160; carcinoma of, with special reference to yellow discharge which appears with it, 464; insufflation of, 464

Fallot's tetralogy, Pulmonary stenosis with intact ventricular septum and; assessment of postoperative results, 238; new surgical method for relief of, 438

Fat, Emulsions of, for clinical intravenous therapy, 193; cerebral embolism of, in differential diagnosis with other posttraumatic cerebral lesions, 333

Femur, Intramedullary nailing for fracture of shaft of; review of 80 operations, 80; fractures of shaft of; study of closed reduction and open treatment, 80; osteochondrosis of capital epiphysis of, Legg-Calvé-Perthes disease; long term end results in 90 patients, 81; fractures of, in children, 180; phlebography of head of, in fresh fractures of medial femoral neck portion, 180; conservative treatment of impacted fractures of neck of, 283; pathology of slipped upper femoral epiphysis, 487; treatment of slipped upper femoral epiphysis, 487; simultaneous bilateral fractures of neck of, 487; nailing of femoral neck fractures and pertrochanteric fractures with polyamide nail, 487; mechanical and architectonic bases for treatment of fractures of neck of, 488; chemical osteosynthesis of fractures and nonunions of shafts of long bones of lower extremity, 488; trochanteric reconstruction operation for ununited fractures of upper end of, 558

Fertility, After conservative surgery in tubal pregnancy, 264

Fetus, Death of, before onset of labor; analysis of 407 cases, 66; death of, during labor, 269; effects of cancer chemotherapeutic agents on human, 305; disease of, and erythroblastemia, 371

Fibrinolysin, Effect of intravenous pitocin on fibrinogen and, 370; role of fibrinolytic agents in thrombotic diseases, 387; plasmin therapy in acute deep thrombophlebitis, 387; fibrinolytic system and use of, in myocardial infarction, 389

Finger, Treatment of extensor tendons of, 183; locked middle, 383

Fistula, Spontaneous biliary, 154; management of bronchopleural, 232; treatment of esophagothoracic, 348; vesicocolic, 357; cholecystocholedochal, 361; postoperative pancreatic, 363; comparative study of vesicovaginal, following delivery, 371; esophageal, as complication of extrapleural pneumothorax, 439; recognition of internal spontaneous biliary, 453

Foot, Lambrinudi's arthrodesis, 78; aplasia of fibula and outer toes; cleft foot; etiology of congenital anomalies of locomotor system, 82; indications for and results of metatarsal amputation in gangrene of arterial origin, 83; surgical treatment of hammertoes, 83; changes in volume of, and capillary fragility during continuous cold exposure and starvation, 187; peroneal spastic flatfoot, 490

Fractures, Effect of gonadal steroids on bone and their use in treatment of; collective review, 1; study of 382, of cheek bone, 15; repair of experimental, under action of growth hormone, thyrotropin, and cortisone, 77; biophysical investigations of mineral phase in healing, 77; pathologic, of spine, 79; intramedullary nailing for femoral shaft; review of 80 operations, 80; femoral shaft; study of closed reduction and open treatment, 80; modern trends in treatment of closed, of shaft of tibia; study based on 260 cases, 82; delayed treatment of jaw, 115; treatment of recent, of upper end of radius, 177; of proximal metaphysis of radius in childhood and in adolescence, 177; of lip of acetabulum with traumatic luxation of hip, 179; of femur in children, 180; phlebography of femoral head in fresh, of medial femoral neck portion, 180; treatment of torsion, of tibia, 181; interfragmentary diastasis in tibial malleolus, 181; external splintage as cause of movement in, 183; of skull, ophthalmologic significance, 215; in amputees, 281; complications following Bryant's traction, 281; follow-up of 22 cases of surgically treated old, and pseudarthroses of navicular bone of hand, 282; conservative treatment of impacted femoral neck, 283; shaft, of lower leg, 283; internal fixation of, by means of polyurethane foam, 379; polyurethane polymer, ostamer; its use in, and diseased bones, 379; indications and techniques for early stabilization of neck in some fracture dis-

locations of cervical spine, 379; long term results of, of proximal radius, 380; of the base of first metacarpal bone, 380; conservative treatment of compression, of distal end of tibia, 382; isolated, of sustentaculum tali with dislocation of body of calcaneus to outside, 383; of clavicle, 485; of scapula, 485; rational approach to classification and treatment of, of surgical neck of humerus, 485; radial nerve injuries in, of shaft of humerus, 486; of forearm in adults, 486; simultaneous bilateral, of neck of femur, 487; nailing of femoral neck and pertrochanteric, with polyamide nail, 487; mechanical and architectonic bases for treatment of femoral neck, 488; chemical osteosynthesis of, and nonunions of shafts of long bones of lower extremity, 488; closed wire fixation of supracondylar, in children, 556; of os multangulum majus, 556; of hip, method for more positive stabilization, 557; trochanteric reconstruction operation for ununited, of upper end of femur, 558; treatment of closed, of diaphysis of tibia and fibula, 559

Fructose, Use of hypertonic levulose in medical and surgical patients, 91

GALLBLADDER, Surgery of hernia and, in patients over 70, 39; recent experiences with spontaneously disappearing gallstones, 53; cholelithiasis and biliary dystonia; follow-up after operations on, in 1949 to 1955, 53; early surgical treatment of acute cholecystitis; necessity of operative cholangiography, 53; late results of 300 cholecystectomies performed with aid of operative radiomanometry, 54; anesthesia and operative cholangiography, 97; roentgenologic study of evacuation of, following nonbiliary tract surgery, 152; internal anastomoses in operations on, 152; surgical indications in cholelithiasis; prophylactic cholecystectomy elucidated on basis of long term follow-up on 526 nonoperated cases, 152; primary carcinoma of, 152; tomography in intravenous cholangiography, 200; treatment of incidents occurring during cholangiography with biligrafin, 200; oral cholangiogram, 254; management in acute cholecystitis, 254; benign neoplasms of, 255; decision for elective cholecystectomy, 255; intravenous cholangiography in diagnosis of acute cholecystitis, 298; percutaneous transhepatic cholangiography, 298; intravenous cholangiography in differential diagnosis of acute cholecystitis, 360; cholecystocholedochal fistulas, 361; new physiologic aspects of reflux into duct of Wirsung during operative cholangiography, 362; irritable colon and disease of, 449; gallstones and pregnancy; composition of bile of, in pregnant woman at term, 454; intravenous cholangiography in biliary tract disease, 454; value of cholecystography in acute cholecystitis with special reference to nonvisualization, 456; defense of conservative treatment for acute cholecystitis, 456; postcholecystectomy syndrome, 456; peroperative cholangiography and problems of visualization and treatment of stones and strictures in biliary tract, 545

Gastrectomy, Gastroduodenal ulcer and Pean-Billroth, 41; subtotal, for bleeding duodenal ulcer in childhood; report of 3 cases with 6 year follow-up study in 1, 41; review of Billroth I, 45; late results and protein studies after partial, 45; vitamin A deficiency following total, 45; esophagitis following total, 46; dumping syndrome; factors responsible for symptoms, cause of syndrome, and rationale of its treatment, 46; segmental, with innervated antrum for duodenal ulcer, 141; Polya, with Y anastomosis in treatment of duodenal ulcer; experience during 8 year period, 142; study of pancreatic response to food after, in man, 142; early dysfunction of anastomosis after subtotal, 143; late development of gastric cancer after, for malignant disease, 143; nutrition after gastric resection, 247; dumping syndrome; conversion of Billroth II to Billroth I, for severe dumping syndrome, 248; biliary lithiasis after partial, for gastroduodenal ulcers, 254; new technique for closure of duodenal stump after Billroth II, 352; total, 353; electrogastrogram in postgastrectomy patients, 353; dumping after partial, for duodenal ulcer, 353; incidence, intensity, and duration of postgastrectomy symptoms, 354; evaluation of various surgical procedures for restoration of alimentary continuity after total, 354; with transposition of jejunum, 446; true operative mortality in, for peptic ulcer, 446; effects of alcohol on absorption of vitamin A in normal subjects and in subjects who have undergone, 447; chromic oxide indicator method for evaluation of intestinal absorption after total, 447; follow-up study of 127 patients with stomal ulcer, 448; operative treatment of anastomotic ulcers, 448; surgical sepsis, report on subtotal, 497; hypoglycemic symptoms following, 543

Gastrointestinal tract, Primary lymphosarcoma of, 44; dumping syndrome; factors responsible for symptoms, cause of syndrome, and rationale of its treatment, 46; hemorrhage from, 47; hemorrhage from, 47; rare causes of hemorrhage from, 47; closing mechanism at gastroesophageal junction, 135; role of fundus in prevention of gastroesophageal regurgitation, 138; evaluation of serum amylase levels in nonpancreatic disease, 138; early dysfunction of anastomosis after subtotal gastrectomy, 143; diagnosis of bleeding site in, by use of radiochromate-tagged red cells, 144; quantitative determination of bleeding from, using Cr^{51}-labeled red blood cells, 144; surgical aspects of hemorrhage from, in infancy, 145; gastroduodenal hemorrhage as surgical emergency, 145; familial polyposis limited to females of one family for 3 generations, 145; recent experience with hemorrhage from, complicating severe liver disease, 151; improved sump suction drain for management of gastric and intestinal fistulas, 198; local gastric hypothermia in treatment of massive hemorrhage from upper, 246; necropsy data in 135 deaths from massive hemorrhage from, 246; jejunal biopsy in adult celiac disease and allied disorders, 249; carcinoid tumors of, 297; surgical intervention in massive gastroduodenal hemorrhage, 351; primary malignant lymphoma of, 355; histochemical reactions in carcinoid tumors of human, 355; treatment of postoperative gas pains, 392; prolapse of gastric mucosa of pylorus in childhood, 444; acute hemorrhagic necrosis of, 448; acute postoperative ulcers of, 448; familial recurring polyserositis simulating acute surgical condition of abdomen, 448; roentgenologic examination in differential diagnosis of recurrent vomiting in early infancy, 571

Genital organs (female), Further studies on surgical cure of retroversion, 59; treatment of malignant chorioepithelioma, 62; mortality among women in 3 Catholic religious orders with special reference to cancer, 102; treatment of advanced carcinoma of breast by bilateral oophorectomy and prednisone, 128; treatment of metastasizing cancer of breast with oophorectomy and cortisone, 128; hormocytogram, synthesis of endocrinologic gynecologic explorations, 159; pregnancy associated with congenital malformations of reproductive tract, 162; "clear glands" in endometrium in diagnosis of uterine abortion and contribution on delayed menstrual discharge, 164; nuclear sex of testicular tumors and some related ovarian and extragonadal neoplasms, 170; pelvic arteriography in study of gynecologic disease, 201; celioscopy in gynecology, 259; some aspects of

hydatidiform mole and ectopic trophoblastic tissue, 259; gynecologic surgery in elderly patients, 259; genital discharges, 262; evaluation of electrovaginal potential recordings as therapeutic guide in gynecologic problems, 262; furacin (nitrofurazone) vaginal suppositories in operative gynecology, 263; hazards of diagnostic roentgenology in obstetrics and gynecology, 295; clinical aspects of progesterone metabolism, 365; protracted administration of new synthetic progestative, 365; hormonal response of endometrium in endometriotic implants and its relationship to symptomatology, 365; gynecologic relaparotomies, 367; syndrome of polycystic ovaries and hyperthecosis, 368; management of gynecologic-urologic complications, 376; roentgenographic diagnosis of gynecologic tumors, 403; therapeutic castration for advanced mammary cancer, 429; prophylactic bilateral adrenalectomy and oophorectomy for advanced cancer of breast, 430; control of intractable pelvic hemorrhage by ligation of hypogastric artery, 461; pseudopregnancy induced by progesteroids in treatment of uterine hypoplasia, 461; details of pelvic exenteration evolved during experience with 75 cases, 462; therapy of surgical lesions of ureter in women, 463; antagonism and synergism of hormonal steroids, 463; is vaginal examination in labor significant cause of genital tract infection, 465; multiple local treatment of human genital trichomoniasis, 547; treatment of trichomoniasis in female, 548

Genital organs (male), Sexual dysfunction as complication of abdominoperineal resection of rectum in male, 51; sexual potency in aging males; technique of avoiding nerve injury in perineal prostatic operations, 71; sexual function following surgery for ulcerative colitis, 149; nuclear sex of testicular tumors and some related ovarian and extragonadal neoplasms, 170; statistical considerations on circumcision and cervical cancer, 261; masculine sterility; results of operative treatment of excretory azoospermia, 374

Geriatrics, Defect of atrial septum in elderly; report of successful correction in 5 patients 60 years of age or older, 36; hernia and gallbladder surgery in patients over 70, 39; serious surgery in aged, 194; thoracic surgery in aged, 229; congenital bicuspid aortic valve in elderly, 238; gynecologic surgery in elderly patients, 259; ulcerative colitis in older age patients, 450; extended use of Le Fort operation for vaginal prolapse in elderly, 548

Gingiva, Healing of gingival mucoperiosteal flaps, 17

Glaucoma, Diagnosis and treatment of simple, 16; shortening of angle of anterior chamber in angle closure, 16; peripheral iridectomy in closed angle, 215; results of surgery in patients with tubular fields due to, 329; iridocorneosclerectomy for, 418; surgical results in acute, 418

Gold, radioactive, In management of ovarian carcinoma, 404

Grafts, Cold-preserved homografts of dura used in injuries to cranial vault, 121; repair of dural defects by, 121; exposure and natural fixation of split-thickness, 126; repair of abdominal hernias with dermis transplants, 138; of tendon, 184; of polyurethane in aorta of dogs, 189; total and partial reconstruction of lower lip with innervated muscle-bearing flaps, 216; flap, to upper extremity, 224; rehabilitation of patients with deep burns connected with recovery of function and sensation of grafted skin areas, 289; long term preservation of donor tissues for corneal, 328; immediate, of skin after orbital or orbital-sinus exenteration for malignant tumors, 329; matching facial color with split thickness skin, from adjacent areas, 339; phosphatase activity in pedunculated skin flaps, 339; experimental lamellar heterografts, 407; effects of 6-mercaptopurine on homograft reactions, 427; local pedicle flaps in traumatic amputations of finger tip, 427; anorganic bone, 484; experimental replacement of aortic arch by homografts, 492; specificity of skin homograft rejection in man, 508; homografting of sympathectomized skin in humans, 508; transfer of free composite, of skin and fat, 531; determination of viability of pedicled tubular skin, 532; subcutaneous dermis, 532; deproteinized animal bone, 555; studies on healing of successful skin homografts in albino rats, 573; acquired partial tolerance to homologous skin, in human infant at birth, 574; homologous composite tissue, of digital flexor mechanism in human beings, 574; tissue bank, 574

Hand, Surgery of arthritic, 79; clinical and electrical study of ulnar nerve lesions in, 221; Dupuytren's contracture, 223; reconstruction of, by local transfer of composite tissue island flaps, 224; follow-up of 22 cases of surgically treated old fractures and pseudarthroses of navicular bone of, 282; sympathectomy in treatment of causalgic, 338; organization of small arteries of, and digits, 491; flexor tendon ruptures in forearm and, 559; median nerve palsy as complication of acute pyogenic infections of, 560; arteriovenous fistulas of, 561

Head, Reparative surgery of cancer of neck and, 15; malignant tumors of neck and, 19; endotracheal anesthesia complications associated with surgery of neck and, 97; swallowing dysfunction associated with radical surgery of neck and, 116

Heart, Pulmonary embolism and thrombosis of right side of; delineation of 2 fatal syndromes in surgical patients, 31; surgical correction of aortic regurgitation, 34; subisthmic aortic stenosis and occlusive disease, 34; results of shunt procedures in tetralogy of Fallot, 35; prevention of block of, in surgical repair of interventricular septal defect, 35; surgical treatment of ventricular septal defects, 35; defect of atrial septum in elderly, report of successful correction in 5 patients 60 years of age or older, 35; postpericardiotomy syndrome following penetrating stab wounds of chest; comparison with postommissurotomy syndrome, 36; restenosis of mitral valve, account of 50 second operations, 36; effect of childbearing on course of rheumatic disease of, 67; preoperative factors in production of arrest of, 91; congenital coronary arteriovenous fistula, 132; vascular ring in infancy, 133; comparison of internal mammary artery ligation and sham operation for angina pectoris, 133; aortic valvuloplasty under direct vision, 133; calcific mitral stenosis and mitral valvotomy, 134; pulmonic stenosis in first year of life, 134; performance of stationary vertical screen oxygenator (Mayo-Gibbon), 196; retrograde perfusion of coronary sinus with gaseous oxygen, 236; persistence of left superior vena cava, 237; surgical correction of coarctation of main pulmonary artery, 237; injury of, due to nonpenetrating chest trauma, 237; gunshot wounds of, 237; pulmonary stenosis with intact ventricular septum and Fallot's tetralogy; assessment of postoperative results by auscultation and phonocardiography, 238; congenital bicuspid aortic valve, 238; congenital bicuspid aortic valve in elderly, 238; anatomic variations in 46 patients with congenital aortic stenosis, 238; course of mitral stenosis without surgery, 10 and 20 year perspectives, 239; correction of mitral insufficiency under direct vision, 239; induced fibrillatory arrest in open heart surgery, 239; experiences with open heart surgery during cardiopulmonary bypass in 270 cases, 240; pendulum type of artificial, within chest, 240; roller type of artificial, within

chest, 240; rotating disc blood oxygenator and integral heat exchanger of improved inherent efficiency, 290; potassium ion as cardioplegic agent in total cardiac bypass and during hypothermia with coronary perfusion, 291; effects of radiations on, 300; effect of radiation upon, 300; patent ductus arteriosus, 346; atypical defects of atrial septum, 346; Adams-Stokes attacks due to atrial and ventricular arrest treated by vagotomy, 346; selection for surgery of patients with ventricular septal defect and pulmonary hypertension, 347; functional changes of muscle of, after artificial cardioplegia, 347; extracardial bypass of valves of, 347; venoarterial pumping, proposed technique for relief of stress of, 347; four dreaded complications of open heart operations, 348; profound hypothermia in surgery of, 396; hypothermia in surgery of, 396; beneficial effects of hypothermia after arrest of, 396; design and use of pump oxygenator, 396; complications after intracardiac surgery with aid of extracorporeal circulation, 398; anesthetic management of penetrating wounds of, 400; cinefluorographic detection and recording of calcifications within, 402; localization of bullets and metallic fragments in cardiovascular system, 402; preliminary studies on transplantation of supercooled, 407; prognostic value of catheterization of right side of, preceding pneumonectomy in presence of respiratory insufficiency, 432; experimental observation on arrest of, induced by anoxia or potassium citrate injection, 437; supersonic investigations in sounds of, and mitral stenosis, 437; new surgical method for relief of Fallot's tetralogy, 438; surgical results in patients with septal defects of, 438; operative treatment of constrictive pericarditis, 438; hemorrhage and transfusion as major cause of arrest of, 495; selective hypothermia of myocardium in surgery of open, with extracorporeal circulation, 499; high output bubble oxygenator with variable oxygenation chamber for bypass of, 500; left ventricular and systemic arterial catheterization, 503; homologous transplant of, in dogs, 509; operative approach to transposition of great vessels, 537; congenital aneurysms of aortic sinuses with cardioaortic fistula, 537; surgical treatment of pulmonary stenosis using extracorporeal circulation, 537; partial replacement of mitral valve with synthetic fabric, 538; complete replacement of mitral valve, 538; long term influence of Beck operation for coronary disease, 538; bacterial endocarditis following surgery for congenital disease of, 538; results of 104 prostatectomies in patients with coexisting cardiovascular disease, 551; open surgery of, without need for donor blood priming in pump oxygenator, 567; experiences with catheterization of, using halothane compressed air anesthesia, 569; faulty contrast medium injection in percutaneous ventricular puncture, 572

Hematoma, Of umbilical cord, 66

Hemorrhage, Gastrointestinal, 47; gastrointestinal, 47; rare causes of gastrointestinal, 47; severe, from esophagogastric varices, 52; surgical aspects of gastrointestinal, in infancy, 145; gastroduodenal, as surgical emergency, 145; diverticular disease of colon with, 148; recent experience with gastrointestinal, complicating severe liver disease, 151; diagnosis and treatment of esophageal, 245; local gastric hypothermia in treatment of massive upper gastrointestinal, 246; necropsy data in 135 deaths from massive gastrointestinal, 246; prognosis in subarachnoid, 334; surgical intervention in massive gastroduodenal, 351; surgical treatment of 20 patients with gross, from presumed diverticular disease of colon, 358; control of intractable pelvic, by ligation of hypogastric artery, 461; acute, 495; and transfusion as major cause of cardiac arrest, 495; surgical significance of spontaneous intra-abdominal, 562

Hernia, Clinical significance of roentgenologic hiatus, 39; inguinal, in pediatric patients, 39; surgery of gallbladder and, in patients over 70, 39; repair of abdomen with dermis transplants, 138; intestinal complications of strangulated, 145; incarcerated and obstructed diaphragmatic, 242; significance of reducible inguinal, in closed abdominal injuries, 243; hiatal, 245; herniotomy for umbilical, in bad-risk patient, 245; strangulated diaphragmatic, with gangrene and perforation of stomach, 350; strangulated diaphragmatic, 442; hiatal, with esophagitis, 442; ligation and excision of sac of indirect inguinal; inadequate procedure in adult, 444; hiatus, 540; postoperative diaphragmatic, 540; experiences with surgical treatment of inguinal, in child, 541; comments on treatment of strangulated, 541

Hip, Acute suppurative arthritis of, in neonatal period, 80; congenital dislocation of; studies in early walking group, 178; surgical relief of severe paralytic contracture of, 179; surgery of joint of, 179; traumatic luxation of, with fracture of lip of acetabulum, 179; operative treatment of osteoarthritis of, 282; further review of results of operations on, 381; dilemma of dislocations of, following dashboard injuries, 381; early acetabuloplasty in dysplasia of, 381; traumatic dislocation of, and late results of its treatment, 486; fractures of, method for more positive stabilization, 557; review of 48 cup and 65 acrylic arthroplasties of, 557

Histoplasmosis, Experience with amphotericin in therapy of, 130

Hormones, Hormonal activity of Grawitz's tumors of kidney, 176; inhibition of breast engorgement with endocrine substances and its possible role in prevention of puerperal breast abscess, 225; tissue culture as guide to therapy with, and prognosis of mammary carcinoma, 226; effect of relaxing, on laboring human uterus, 268; treatment of advanced breast cancer with, 341; exogenous sex, and their relation to lifelong adaptations in women with metastatic cancer of breast, 342; urinary estrogens after endocrine ablation, 342; estrogen treated prostatic cancer, 373; effect of 17-methyl-19-nortestosterone (orgasteron) in treatment of threatened abortion, 466; clinical effect of norandrostenolone phenylpropionate (durabolin) in metastasizing mammary cancer patients, 534

Hospital, Staphylococcus aureus from air borne fibers in ward of, 290; increased transmissibility of staphylococci to patients receiving antimicrobial drug, 290; emergency treatment cart in modern, 294; disinfection of hands of surgeons and nurses, 391; staphylococcal wound infection in surgical unit, 565; staphylococcal pathogenicity: community and, 566

Humerus, Rational approach to classification and treatment of fractures of surgical neck of, 485; radial nerve injuries in fractures of shaft of, 486

Hydatid cyst, Justification and value of resection of protruding dome of, of liver, 52; surgical therapy of, of lung, 233

Hydatidiform mole, Some aspects of, and ectopic trophoblastic tissue, 259; and choriocarcinoma, 371

Hydrocephalus, 220; internus, 220

Hydronephrosis, Due to inferior polar artery; late results after nephroplication, 73; experimental aspects of, 73

Hypertension, Renovascular, treated by thromboendarterectomy, 87; effect of pituitrin on, of portal system, 151; 10 year study of effect of thoracolumbar sympathectomy on clinical course of primary (essential), 222; renal revascularization for, 491; surgical therapy of arterial, 561

Hypnosis, As adjunct in anesthesiology, 95
Hypopharynx, Surgical treatment of pulsion diverticula of, 116; lateral approach to larynx and, 119
Hypophysectomy, Evaluation of graded, in man, 23; in treatment of breast cancer, 23; in inoperable cancer of breast, 23; aldosterone excretion in hypopituitarism and after, in man, 122; discussion on assessment of endocrine function after, or pituitary destruction, 123; in treatment of metastatic mammary cancer, 221; surgical and stereotaxic, for cancer, 221; ocular complications of transsphenoidal yttrium 90, 336; selection of breast cancer patients for adrenalectomy or, 429; analgesic action of, on metastatic cancers, 528; and adrenalectomy for advanced cancer of breast, 533
Hypophysis, Neurosurgeon's new interest in, 22; aldosterone excretion in hypopituitarism and after hypophysectomy in man, 122; roentgen therapy in treatment of tumors of, 425; intractable peptic ulcer and endocrine adenomas with pituitary amphophilic hyperplasia, 445; width (third dimension) of sella turcica, 527; tumors of, in Dunedin Neurosurgical Unit, 528; implantation of radioactive gold into, in treatment of cancer of breast, 528
Hypothermia, Induced, and intravascular aggregation, 95; use of, in septic shock, 95; effects of vagal blockade on respiratory work in hypothermic animal, 395; comparative thermoelectrical measurements of organ, blood, and tissue temperature in, in surface and bloodstream cooling, 396; profound, in cardiac surgery, 396; in cardiac surgery, 396; beneficial effects of, after cardiac arrest, 396; renal and portal blood flow under normothermic and hypothermic conditions during extracorporeal circulation, 397; extracorporeal circulation with, 397; selective, of myocardium in open heart surgery with extracorporeal circulation, 499; effective blood heat exchanger for deep, in association with extracorporeal circulation but excluding oxygenator, 567
Hysterectomy, Cervicectomy following supravaginal, 159; postoperative disorders of bladder, renal pelvis, and ureter after Okabayashi's radical, 260; vaginal prolapse following, 263; carcinoma of cervix; treatment by radical, following central irradiation, 366; vaginal closure of vesicovaginal fistulas after, 367

Ileostomy, Immediate and late results of anal, after total proctocolectomy for ulcerative colitis, 150; subtotal colectomy with anal, 253
Ileum, Substitution with, for creation of continent urinary bladder, 75; surgical management of Crohn's disease, 250; treatment of regional enteritis, 250; diagnostic roentgenography of regional ileitis, 297
Incontinence, Partial denervation of bladder; new operation for treatment of urge, and similar conditions in women, 75; stress, of urine, 481
Infants, Similarities of mechanical intestinal obstruction and aganglionic megacolon in newborn, 49; in cesarean section, 69; coarctation of aorta in, 85; surgical aspects of gastrointestinal hemorrhage in, 145; ileoileal intussusception; ileum into ileum, pernicious type in children and, 147; acute massive perforation of peptic ulcer in, 246; hyperbilirubinemia of prematurity, 272; congenital localized pulmonary emphysema and tension cysts of lungs in children and, 345; pyloric stenosis in premature, 351; renal excretion of water in, immediately following operations; surface surgical procedures, 392; surgical exploration in obstructive jaundice of, 453; symmetrical peripheral edema in, 473; hyperthermia after surgical operation in children and, 498; postsplenectomy infection in children and, 499; roentgenography in differential diagnosis of recurrent vomiting in, 571
Infections, Study of relationship of normal bactericidal activity of human serum to bacterial, 94; effect of whole body radiation and, on arterial replacement, 188; cross, with Pseudomonas pyocyanea, 195; bacillus faecalis alcaligenes septicemia in newborn, 272; of burns, 288; bacteriophage typing of Staphylococcus aureus, 330; bacterial wound complications after aseptic and conditionally aseptic operations, 393; acute hematogenous osteomyelitis, 483; pyogenic osteomyelitis and arthritis of spine treated with combinations of antibiotic and gamma globulin, 484; hematogenous pyogenic vertebral osteomyelitis, 484; postsplenectomy, in infants and children, 499; overwhelming, in children following splenectomy, 546; median nerve palsy as complication of acute pyogenic, of hand, 560
Intestine, Problem of distention in low obstruction of small, with special reference to its management at operation, 48; similarities of mechanical obstruction of, and aganglionic megacolon in newborn infants; review of 64 cases, 49; toxic dilatation of colon in course of ulcerative colitis, 49; magnesium deficiency following massive resection of, 50; biopsy of normal, 145; intestinal complications of strangulated hernia, 145; diagnosis, management, and prognosis of abdominal injuries with special reference to massive resection of, 146; relation of small bowel resection to nutrition in man, 146; volvulus of small, in adults, 146; tumors of small, 146; sarcomas of small, report of 3 pathologic types, 147; ileoileal intussusception; ileum into ileum, pernicious type in infants and children, 147; surgical treatment of regional enteritis, 148; function of sphincter of Oddi and motility of small, 154; uses of different segments of, in urology, 175; ileocystoplasty using section of ileum as flat graft, 175; malrotation of, and duodenal ileus, 249; midgut volvulus, 249; Noble plication for obstruction of, due to adhesions, 251; volvulus associated with pregnancy, 267; recurrent renal stones treated by plastic operation utilizing segments of, 276; simple distal ileal obstruction, 297; roentgen findings in severe pseudomembranous enterocolitis, 298; appraisal of routine postoperative use of pantothenyl alcohol for prevention of atony of, 354; transmission of excitation in wall of, 354; some surgical aspects o malabsorption syndrome, 355; malignant carcinoid tumors of, 356; congenital obstruction of, 356; small bowel atresia; treatment by resection and primary aseptic anastomosis, 357; pathogenesis of segmental enteritis, 357; rectal complications of inflammatory disease of small and large bowel, 359; esophageal intrapleural reconstruction with small and large, 441; evaluation of absorption in, after total gastrectomy; chromic oxide indicator method, 447; use of antiperistaltic segments of, following massive resection of small, 449; role of antisepsis of, in preoperative preparation of colon, 450; perforation of colon in obstruction of large, due to carcinoma, 450; recurrent volvulus of small, in newborn infant, 473; problems encountered in diagnosis and treatment of spontaneous perforation of, in newborn, 550
Intussusception, Barium enema reduction for treatment of, in children, 147; ileoileal; ileum into ileum, pernicious type in infants and children, 147; review of management of, in pediatric center, 1938 to 1958, 356; recurrent acute, 543
Iodine, radioactive, Albumin tagged with, in localization of placental site, 64; thyroidectomy for hyperthyroidism following unsatisfactory response to radioiodine treatment, 119; factors which influence radioactive iodine thyroidal uptake test, 202; use of, in evaluation of thyroid nodules, 301; studies with, in diagnosis of Hashimoto's thyroiditis, 301

Irradiation, Preoperative, for cancer of esophagus, 38; carcinoma of cervix uteri; treatment by supervoltage, 61; early recognition of radioresistant carcinoma of collum uteri, 61; long term follow-up of 32 patients subjected to, for thymic enlargement in infancy, 100; technique of, of conscious patients under increased oxygen pressure, 100; some observations on treatment of hematopoietic depression after, in man by infusion of stored autogenous bone marrow, 204; nasopharyngeal malignant tumors, 300; carcinoma of cervix; treatment by radical hysterectomy following central, 366; complications of, of bladder tumors, 480; neoplasia following therapeutic, for benign conditions in childhood, 506; and marrow transplantation, 510

Ivalon, Experimental study of polyvinyl-formal sponge as substitute for tissue, 102

JAUNDICE, Neonatal hyperbilirubinemia, 272; hyperbilirubinemia of prematurity, 272; relation between physiologic icterus of prematurity and late toxemia of pregnancy, 372; surgical exploration in obstructive, of infancy, 453

Jaw, Delayed treatment of fractures of, 115; malignant tumors of upper, 115; evaluation of radical neck dissections and dissections of, 120; histopathology of masseteric hypertrophy, 421; interosseous wiring of mandibular fractures, 524; role of trauma in pathogenesis of temporomandibular joint arthrosis, 524

Jejunum, Gastrectomy with transposition of, 446; obstructions of, 447

Joints, Principle of decompression in surgery of, 182; does heavy work cause increase of "fusion symptoms" of musculoskeletal system, 183; tennis elbow, 185; little leaguer's elbow, 283; benign synovioma, new criterion of classification, 489; dislocation of shoulder, 556; technique of digital arthroplasty and arthrodesis of hammer toes, 559

KANAMYCIN, Treatment of urinary tuberculosis with, 172

Kidney, Discussion of theory of juxtamedullary hemodynamic shortcircuiting of renal arterial circulation, 73; experimental aspects of hydronephrosis, 73; hydronephrosis due to inferior polar artery; late results after nephroplication, 73; spontaneous rupture of hypernephroma simulating acute surgical abdomen, 137; mesenchymal hamartomas of, 171; late results of resection of, in renal tuberculosis, 171; acute failure of; 80 cases of renal tubular necrosis, 171; gastrodialysis in treatment of acute failure of, 172; pelviureteric junction, cinepyelography study, 172; hormonal activity of Grawitz's tumors of, 176; postoperative dysfunction of, 193; localization of stones in drainage system of, by means of planigraphy, 201; changes in clearance of, after lumbar sympathectomy, 222; excretory urogram as test of function of, 275; shell fragment injuries of, 275; healing of wounds of; surgical repair of contusions and lacerations, 275; development of efficient chemotherapy for tuberculosis of, 275; radioactive hypaque renogram in acute obstruction of, 276; surgery of solitary, 276; recurrent stones of, treated by plastic operation utilizing intestinal segments, 276; comparison of permanent nephrostomy and permanent cutaneous ureterostomy, 277; change in volume of, by spinal anesthesia with associated treatments, 293; renal fornical hemorrhages, 375; treatment of tuberculosis of, 375; nephropathies caused by burial during Agadir earthquake, 375; partial nephrectomy in calyceal lithiasis, 376; management of parenchymal defects of, after partial resection and partial amputation, 376; damage to, resulting from blood transfusion reactions, 390; first report of homotransplant of, from sister to nontwin brother, 408; emergency surgery of, in newborn infant, 474; injured, 477; horseshoe, 477; carcinoma of, 477; partial nephrectomy in tumor of, 478; survival of patients following nephrectomy for renal cell and transitional cell tumors of, 478; renal revascularization for hypertension, 491; arteriographic study of circulation of, after transfusion of incompatible blood, 507; successful homotransplantation of, between nonidentical twins, 509; renal trauma, 553; simple direct approach to renal pedicle, 553; residual, after unilateral nephrectomy, 553; acute insufficiency of, following aortic surgery, 563

Knee, Ligamentous disruption of; review with analysis of 28 cases, 81; large parameniscal cysts of, with relation to cystic changes of menisci, 82; congenital dislocation of, 180; experiences with 130 fusions of, 181; late results of meniscectomy, 382; anthroplasty of, 558; intramedullary nailing of joint of, with reversal "sliding grafts," 558; operative treatment of painful and severe arthroses of joints of, 559

LABOR, Induction of, around full term, especially by means of synthetic oxytocin intravenous drip; efficacy, risks, and indications, 68; propped position for second stage of, 68; critical evaluation of induction and conduct of, 166; spatulas and toboggan maneuver, 166; cervical incisions in present day obstetrics, 167; cesarean section, 167; elective induction of, 267; elective induction of, with oxytocin and amniotomy, 267; complications of elective induction of, 268; effect of relaxing hormone on human uterus in, 268; surgical induction of, in management of contracted pelvis, 268; mid forceps operation, 268; causes of fetal head moulding in, 269; fetal death during, 269; uterine rupture, 269; significance of engagement of fetal head in Puerto Rican primiparas, 370; breech management with caudal anesthesia, 370; obstructed, 370; effect of intravenous pitocin on fibrinogen and fibrinolysin, 370; relationship between, and delivery and mechanism of fetal oxygenation in normal obstetric patient, 371; comparative study of vesicovaginal fistulas following delivery, 371; is vaginal examination in, significant cause of genital tract infection, 465; face presentation, 471; transverse presentation; management by vaginal delivery, 471; numorphan in, 471; use of vacuum extractor (ventouse) in obstetrics, 472; in elderly primipara, 472; spinal block during, 501; pregnancy, and puerperium in very young primiparas, 549; high amniorrhexis and induction of, 550

Lactation, Suppression of; double blind hormone study, 69

Larynx, Laryngography with opaque contrast medium, 99; lateral approach to hypopharynx and, 119; laryngectomy; past, present, future, 217; survival rate in patients with cancer of, 305; reappraisal of 75 cases of radical neck dissection for carcinoma of, 332; cancer of pharynx, upper cervical esophagus, and, 422

Leg, Shaft fractures of lower, 283; results of Blount's epiphysiodeses, 382

Legg-Calvé-Perthes disease, Osteochondrosis of capital epiphysis of femur; long term end results in 90 patients, 81

Leukemia, Radiation and, in carcinoma of cervix, 404

Levulose, Use of hypertonic, in medical and surgical patients, 91

Lipoma, Submucous, of colon, 252

Liver, Justification and value of resection of protruding dome of hydatid cysts of, 52; primary carcinoma of, in infancy and childhood; report of 11 cases and review of literature, 53; presence of tumor inhibitory principle in, 101; systemic absorption of orally ad-

ministered neomycin in disease of, 151; recent experience with gastrointestinal hemorrhage complicating severe disease of, 151; new method of pancreaticoduodenectomy designed to preserve function of pancreas and, 156; experimental studies of factors influencing metastases of; effect of cortisone and adrenalectomy, 253; importance of afferent circulation in structure and function of, 302; morphologic investigations of surgical anatomy of, 359; clinical utilization of biopsy of, 359; thyroiditis and cirrhosis of, 360; leukemoid reaction and intermittent Charcot's fever as clinical syndrome in carcinomatous biliary tract obstruction and metastases of, 361; donor-type lymphatic tissue cells in lethally irradiated mice treated with homologous fetal, 407; changing trends in casuistics of abscess of, 452; primary neoplasms of, 453; aneurysm of hepatic artery, 453; right hemihepatectomy for primary hepatoma, 544

Lung, Selective bronchography, 28; bronchospirometric determinations during open chest surgery, 29; functional respiratory study in decortication of, 28; selective bronchial blockage during resectional surgery of, 29; bronchoscopy performed under general anesthesia plus artificial respiratory paralysis, 29; unilateral radiolucence of, with decreased vascularity, 30; open biopsy of, for diffuse pulmonary lesions, 30; round lesions of, 30; destroyed, 31; partial resection of only remaining, with aid of respirator treatment, 31; resection for tuberculosis of, in infants and children, 31; residual lesion in tuberculosis of, requiring surgery, 32; preoperative and postoperative mediastinal infiltration with suspension of radioactive chromium phosphate in treatment of bronchogenic carcinoma, 32; evaluation of roentgen therapy in management of nonresectable carcinoma of, 33; primary carcinoma of, follow-up study including pulmonary function studies of long-term survivors, 33; 5 year follow-up of roentgenographically detected cancer of, 33; effects of ether, cyclopropane, nitrous oxide, and fluothane upon alveoli of; experimental study on mouse, by means of light and electron microscope, 96; physiologic factors affecting airway resistance in normal subjects and in patients with obstructive respiratory disease, 129; evaluation of slope-volume method as index of blood volume of, 129; 3 new cases of intrapulmonary cyst, 130; surgical treatment of spontaneous pneumothorax, 130; tuberculous empyema, 130; resectional therapy for tuberculosis of; evaluation of technique of reconstitution of, in segmental resections, 131; 5 year survey of results of cytologic examination for cancer of, 131; carcinoma of, 131; results of surgical treatment of bronchogenic carcinoma, 131; postpneumonectomy state, clinical and physiologic observations in 36 cases, 132; contralateral pneumothorax after pneumonectomy for carcinoma, 132; incidence of peptic ulceration in chronic obstructive emphysema of, 139; role and action of environmental agents in pathogenesis of cancer of; cigarette smoke, 203; thoracic surgery in aged, 229; thoracic surgery in presence of insufficiency and disability of, 229; unilateral transradiancy of, 229; circulatory changes due to open pneumothorax in surgical patients, 230; aberrant left pulmonary artery, 230; treatment of spontaneous pneumothorax by immediate and continuous suction, 230; simplified closed circuit helium dilution method for determination of residual volume of, 230; some effects of restriction of chest cage expansion on function of, in man, 230; decortication as operation to improve function of, 231; relationship of hyperinflated, to obstructive disease of, 231; emphysema of, problem in diagnosis, 231; respiratory response to inhaled carbon dioxide, 7 per cent, indication of emphysema of, 231; preoperative and postoperative cardiopulmonary dynamics of emphysematous bulla, 232; management of bronchopleural fistulas, 232; bilateral bronchiectasis, 232; surgical therapy of hydatid cysts of, 233; abscess of, in infancy and childhood, 233; prognostic factors and results of treatment of pyogenic abscess of, 233; current therapy in tuberculosis of, 233; bronchitis deformans in tuberculosis of, 234; pneumonectomy for tuberculosis, evaluation of 124 cases, 234; cystic cavitation following chemotherapy of acute tuberculosis, 234; tumors of, and carcinoid syndrome, 234; present position relating to cancer of, 235; bronchogenic carcinoma; comparison of natural course and treatment with resection, x-radiation, and nitrogen mustard, 235; radical lobectomy, 236; infected residual cavities after partial and total resection of, 236; diagnostic efficacy of endobronchial aspiration, biopsy, and cytology of sputum in bronchopulmonary carcinoma, 343; derivation of veins of, 343; function of, in immediate postoperative period, 344; unilateral emphysema, 344; indirect estimation of arterial CO_2 tension in emphysema, 345; congenital localized emphysema of, and tension cysts of, in infants and children, 345; function of, 431; compliance of, and respiratory resistance, 431; respiratory failure; relation between oxygen concentrations of inspired air and arterial blood, 432; prognostic value of catheterization of right side of heart preceding pneumonectomy in presence of respiratory insufficiency, 432; primary interstitial fibrosis of, diffuse and circumscribed forms, 432; surgical management of focalized histoplasmosis of, 433; value of tomography in management of tuberculosis of, 433; surgical resection in tuberculosis of, due to atypical mycobacterium tuberculosis, 433; development of bronchogenic carcinoma in patients with tuberculosis of, 434; bronchiectasis; results of resection of, 436; myasthenia and malignant intrathoracic tumor, 437; esophageal fistulas as complication of extrapleural pneumothorax, 439; oral benign lesions progressing to epidermoid carcinoma with metastasis to, 524; staphylococcal pneumonitis in postoperative patient, 535; choice of methods in treatment of tuberculosis of, 536; treatment of tuberculous lower lobe activity, 536; surgery in management of tuberculosis of, 536; pleural drainage with air replacement as management of pleural cavity following resection of, 537; radiotherapy in inoperable cases of cancer of, 572

Lymphangioma, In infancy and childhood, 388

Lymphatic vessels, Role of, in accumulation of ascitic fluid, 191; radiolymphadenography, method to investigate functional dynamics of lymphatic system, 494; lymphography in chronic secondary lymphedema, 494

Lymph nodes, Evaluation of lymphadenectomy in therapy of cervical cancer, 462; tuberculosis of mesenteric and retroperitoneal, simulating neoplasm, 494

MANDIBLE, Micrognathia of, corrected by vertical osteotomy in rami and iliac bone graft, 17; chronic unilateral dislocation of mandibular joint treated surgically by high condylectomy, 17; fibrous dysplasia of, in children, 216; subperiosteal segmental resection of, 217

Mediastinum, Present health of children given x-ray treatment to anterior, in infancy, 136; tumors of, 241; choriocarcinoma of, 241; experiences with angiography as guide to exploration of, 441; granulomas and pseudotumorous adenopathies of, cause of dysphagia, 539

Melanoma, Malignant, of head and neck, 25; treatment of 126 cases of malignant, 26; malignant, of uvea,

111; treatment of anorectal malignant, 150; host-tumor antagonism; apparently beneficial effects of acute concurrent infections or of toxin therapy on course of malignant, 339; of vulva, 369; cytologic studies of human malignant, culture in vitro, 405; critical appraisal of results of therapy for malignant, 531.

Meninges, Course of purulent meningitis, 530

Mesentery, Panniculitis of, 244; mesenteric vascular disease, 296; findings on plain roentgenograms of abdomen associated with mesenteric vascular occlusion with possible new sign of mesenteric venous thrombosis, 297; mesenteric caval anastomosis, 493; ligation of superior mesenteric artery at different levels, 493.

Metabolism, Metabolic effects of infusion of protein hydrolysate in experimental shock in dogs, 203

Metacarpus, Fractures of base of first metacarpal bone, 380

Metatarsus, Indications for and results of amputation of, in gangrene of arterial origin, 83

Methohexital sodium, New ultrashort acting barbiturate, 97

Mitral valve, Restenosis of; 50 second operations, 36; calcific mitral stenosis and mitral valvotomy, 134; mitral valvotomy and restenosis, 134; course of stenosis of, without surgery, 10 and 20 year perspectives, 239; correction of insufficiency of, under direct vision, 239; transventricular mitral valvotomy, 239; commissurotomy of, in pregnancy, 239; ejection time in stenosis of aortic valve and, 346; complete relief of stenosis of, 347; supersonic investigations in heart sounds and stenosis of, 437; partial replacement of, with synthetic fabric, 538; complete replacement of, 538

Mouth, Healing of gingival mucoperiosteal flaps, 17; solitary xanthoma of attached gingiva, 115; analysis of sites and causes of treatment failures in squamous cell carcinomas of oral cavity, 115; end results and causes of failure in treatment of intraoral carcinoma, 115; evaluation of failures in treatment of cancer of, 116; total and partial reconstruction of lower lip with innervated muscle-bearing flaps, 216; statistical review of intraoral cancer, 420; conference on intraoral cancer, 420; relationship of cancer of, to generalized connective tissue changes, 421; elective neck dissection for intraoral cancer, 423; effect of snuff and tobacco on production of carcinoma of, 507; an oral benign lesion progressing to epidermoid carcinoma with metastasis to lung, 524

Muscle, Carpal tunnel syndrome, 84; does heavy work cause increase of "fusion symptoms" of musculoskeletal system, 183; flexor pollicis longus; its morphology and clinical significance, 284; functional rehabilitation of thumb in ulnar palsy, 383; histopathology of masseteric hypertrophy, 421

Muscle relaxants, Effect of, on function of bladder, 277

Myasthenia, And malignant intrathoracic tumor, 437

Mycoses, Experience with amphotericin in therapy of histoplasmosis, 130; experience with amphotericin B, 566

Myocardium, Circulation of, and biliary tract; experimental observations using electropolarograph, 154; studies of inhibition of plasmin-plasminogen fibrinolytic enzyme system in patients with infarction of, 388; fibrinolytic system and use of fibrinolysin in infarction of, 389

Neck, Reparative surgery of cancer of head and, 15; malignant tumors of head and, 19; endotracheal anesthesia complications associated with surgery of head and, 97; swallowing dysfunction associated with radical surgery of head and, 116; early management in extensive cervical cystic hygroma and macroglossia, 119; approach to stab wounds of, 120; evaluation of radical dissection of, and jaw dissections, 120; indications and techniques for early stabilization of, in some fracture dislocations of cervical spine, 379; teratoma of, 424; congenital malformations of medium and lower thirds of cervical spine, 424; soft tissue injuries of cervical region; collective review, 511

Neomycin, Systemic absorption of orally administered, in liver disease, 151

Nerves, peripheral, Scalenus anticus symptoms; evaluation and surgical treatment, 24; brachial plexus injuries, 221; clinical and electrical study of ulnar nerve lesions in hand, 221; late consequences of sciatic nerve injury, 337; results of repair of sciatic nerve, 337; neurinoma, 426; relief of pain and paresthesias by nerve block distal to lesion, 529

Nerves, sympathetic, Deep tissue temperatures and blood circulatory velocities in lower extremities of patients with obliterative arterial disease 4 years after lumbar gangliectomy, 124; experimental studies on role of autonomic nervous system in occurrence of visceral lesions, 124; effect of thoracolumbar sympathectomy on clinical course of primary (essential) hypertension, 10 year study, 222; changes in renal clearance after lumbar sympathectomy, 222; late effect of lumbar sympathectomy on blood flow in foot in obliterative vascular disease, 338; thoracoscopic sympathectomy, 338; sympathectomy in treatment of causalgic hand, 338; parotid pain after removal of superior cervical sympathetic ganglion, 422; place of lumbar sympathectomy in arteritis obliterans of lower limbs, 530

Nervous system, Plasma fibrinogen levels and erythrocyte sedimentation rates in neurosurgical patients, 334; postoperative alterations of the serum proteins in neurosurgical patients, 334; radiofrequency lesions in the central, of man and cat, 335; methoxyflurane as anesthetic for neurological surgery, 500; neurosurgical applications of tracheostomy, 535

Newborn, Influence of Rh isoimmunization on mortality of, 70; purpura of, with platelet isoantibody in maternal serum, 70; acute suppurative arthritis of hip in neonatal period, 80; duodenal occlusion in, and in infancy, 144; respiratory and cardiovascular alterations during process of anoxic death in, 168; brain disease in stillborn infants and neonates, 270; adaptive changes in immediate postnatal period, with particular reference to respiration, 270; treatment of asphyxia in, 270; circulatory factors in relation to idiopathic respiratory distress, hyaline membrane disease, in, 270; idiopathic perforation of stomach in, 271; rupture of bladder in, 271; exchange transfusions in, using fresh heparinized blood, 271; hyperbilirubinemia in, 272; bacillus faecalis alcaligenes septicemia in, 272; fetal disease and erythroblastemia, 371; retinal hemorrhages in, 372; relation between physiologic icterus of prematurity and late toxemia of pregnancy, 372; chemical stimuli of respiration in early neonatal period, 473; gastric perforation in, caused by congenital defects of gastric musculature, 473; recurrent small bowel volvulus in, 473; water requirements for renal excretion in full term infants and premature infants fed variety of formulas, 473; emergency renal surgery in, 474; problems encountered in diagnosis and treatment of spontaneous perforation of bowel in, 550

Nose, External excisions in rhinoplasty, 215; nasopharyngeal malignant tumors, 300; problem of implants in rhinoplasty, 340; advantages of endotracheal anesthesia in surgery of ear, throat, and, 399; saddle deformity of, and L-shaped graft, 420; facility in tonsil-loadenoidectomy management, 523

Nutrition, Vitamin A deficiency following total gastrectomy, 45; magnesium deficiency following massive intestinal resection, 50; relation of small bowel resection to, in man, 146; after gastric resection, 247

Obstetrics, Arteriographic examination in, 64; promethazine in, 166; promazine for sedation-analgesia in, 166; cervical incisions in present day, 167; anesthesia for, at Toronto General Hospital, 197; anesthesia for emergencies in, 265; hazards of diagnostic roentgenology in gynecology and, 295; relationship between labor and delivery and mechanism of fetal oxygenation in normal obstetric patient, 371; trichloroethylene anesthesia in, 400; brachial palsy at birth; collective review, 409; epidural anesthesia in, 501

Oddi's sphincter, Function of, and motility of small intestine, 154; anatomy and pathology of terminal common bile duct with special reference to stenosis of, 155; calibrated papillosphincterotomy, 459

Ovary, Limitations of Stein-Leventhal syndrome; report of 6 patients with amenorrhea and menstrual disorders treated by wedge resection of, 59; clinicostatistical and heredopathogenetic findings in cancer of, 62; carcinoma of, 63; Krukenberg tumor, study of 48 cases from ovarian tumor registry, 160; autoplastic transplantation of, in patients with cancer of cervix, 160; bilateral polycystic, 261; tumors of, in premenarchal child, 261; neoplasms of, in children, 261; tumors of, in children, 262; histogenesis of Krukenberg's tumor, 368; endocrinologic study in patients with tumors of, 368; "functioning" tumors of, 368; syndrome of polycystic, and hyperthecosis, 368; metastasis of breast carcinoma in, 369; radioactive gold in management of carcinoma of, 404; special aspects of surgical intervention for malignant neoplasms of, 463; feminizing tumors of, 463

Oxygen, Method of controlled administration of, which reduces risk of carbon dioxide retention, 502

Oxytocin, Induction of labor around full term, especially by means of synthetic, in intravenous drip, 68; elective induction of labor with amniotomy and, 267

Pain, Clinical observations and evaluation of conservative treatment of acute low back, due to disc lesion, 178

Palsy, Surgical repair versus expectant treatment in traumatic facial, 213; brachial, at birth; collective review, 409

Pancreas, Contrast roentgenography in differential diagnosis between perforated ulcer and acute pancreatitis, 42; common bile duct groove in, 55; evaluation of cysts of, treated at Johns Hopkins Hospital, 56; diabetes mellitus and carcinoma of, 57; islet cell tumor of, with chronic diarrhea and hypokalemia; recently recognized syndrome, 57; peptic ulcer diathesis with mixed adenocarcinoma of, 140; study of response of, to food after gastrectomy in man, 142; evaluation of common channel as factor in pancreatic or biliary disease, 155; annular, 155; diagnostic value of determinations of serum leucine aminopeptidase concentrations in carcinoma of, 156; tumors of pancreatic islets, 156; new method of pancreaticoduodenectomy designed to preserve function of liver and, 156; hyperinsulinism, 256; pancreatic and ampullary cancer, 257; association of diabetes mellitus with primary carcinoma of, 258; combined secretin and cytology test in diagnosis of cancer of biliary tract and, 362; duodenopancreatic syndromes associated with biliary tract disease revealed by cholangiomanometric studies, 455; reliability of serum amylase determination, 456; effect of retroperitoneal air insufflation on pain due to disease of, 457; experimental research regarding therapy of pseudocysts of, 457; pseudocysts of, 458; islet cell tumors and peptic ulcers, 458; sclerosis of, without calcification and papillitis of sphincter of Oddi, 458; preoperative management in carcinoma of head of, and of papilla, 459; palliative intervention for neoplasm of head of, 459; surgical treatment of carcinoma of head of, and papilla of Vater, 459; serum amylase in peptic gastroduodenal perforation, 542; depression of exocrine secretion of, with carbonic anhydrase inhibitor, 545; carcinoma of, 545

Pancreatic duct, Obstruction of, 256; treatment of recurrent pancreatitis by transduodenal sphincterotomy and exploration of, 257; disease of papilla of Vater, 362; postoperative pancreatic fistula, 363; structure of papilla of Vater and its functional significance in normal and diseased states, 363

Pancreatitis, Acute; enzymatic toxemia and experimental trial of antitrypsins, 56; treatment of acute, 57; clinical considerations in chronic relapsing, 155; traumatic, 257; cortisone therapy for acute necrotizing, 257; surgical treatment of, 257; treatment of recurrent, by transduodenal sphincterotomy and exploration of pancreatic duct, 257; mortality factors in experimental hemorrhagic, 362; effect of serum albumin on enzyme activity in experimental hemorrhagic, in dogs, 456; etiology of, 457; changes in therapy of inflammatory diseases of pancreas, 457

Papilla of Vater, Vaterotomy, 153; disease of, 362; structure of, and its functional significance in normal and diseased states, 363; preoperative management in carcinoma of head of pancreas and of, 459; surgical treatment of carcinoma of head of pancreas and of the, 459

Parathyroid glands, Primary hyperparathyroidism, 117; hyperparathyroidism, 118; elective subtotal parathyroidectomy for renal hyperparathyroidism, 118; renal excretion of phosphorus and hypophosphatemia after parathyroidectomy, 118; advanced skeletal changes in hyperparathyroidism, 199; reconstructive processes of adrenal cortex and parathyroid function, 405; transplantation of homologous, in treatment of chronic tetany, 509

Parkinsonism, Results of 1,000 consecutive basal ganglia operations for, 220; surgical treatment of; use of pneumotaxic guide with recording and stimulation, 336; chemopallidectomy as treatment for, 425

Parotid gland, Observations on "sentinel node" in cancer of, 117; facile exposure of the facial nerve in removal of tumors of, 331; pain in, after removal of superior cervical sympathetic ganglion, 422; surgical management of lesions of, 524

Pelvis, Hemipelvectomy after 68 years, 382

Penicillin, Incidence of circulating antibody to, in hypersensitivity reactions, 394

Penis, Carcinoma of; radium treatment and assessment of results, 72; priapism caused by metastasis to corpora cavernosum, 273; cancer of, 273; question of circumcision, 373; new concept in treatment of Peyronie's disease, 373; malignant tumors of, and treatment, 476; interstitial implantation of radium needles in treatment of carcinoma of, 552

Perfusion, Arterial, in lower limb as aid to vascular surgery, 88; retrograde, of coronary sinus with gaseous oxygen, 236; regional, with cytotoxic agents, 304; studies on abdominal organ, for cancer chemotherapy, 406; regional chemotherapy for cancer, 508; leakage factor in regional, with chemotherapeutic agents, 573

Pericardium, Tamponade of; newer dynamic concepts, 240; operative treatment of constrictive pericarditis, 438

Peritoneum, Malignant mesotheliomas of; clinicopathologic analysis of 12 fatal cases, 39; tuberculous peritonitis, 443

Pharynx, Retropharyngeal cyst of foregut origin associated with vertebral abnormality, 116; treatment of recurrent cancer of cervical esophagus and, 421; cancer of larynx, upper cervical esophagus, and, 422
Pheochromocytoma, Evaluation of pharmacologic and chemical tests as aid to diagnosis of, 76; of urinary bladder, 378
Phosphorus, Renal excretion of, and hypophosphatemia after parathyroidectomy, 118
Pilonidal sinus, Simple marsupialization technique for treatment of, 125
Pitocin, Effect of intravenous, on fibrinogen and fibrinolysin, 370
Pituitrin, Effect of, on hypertension of portal system, 151
Placenta, Albumin tagged with iodine 131 in localization of site of, 64; use of radioisotopes for localization of site of, 64; infarction of, 65; further studies on urinary estriol excretion during pregnancy and its significance for estimation of function and dysfunction of, in advanced pregnancy, 163; pregnanediol excretion in suspected insufficiency of, 266; supine hypotensive syndrome of late pregnancy and premature separation of, 266; severe abruptio placentae, 266; anastomoses of chorionic villi as result of placentitis, 370; conservative treatment of abruptio placentae, 469; clinical analysis of abruptio placentae, 469; premature separation of, 469; previa, 469; human, 549
Plastic surgery, Breast reconstruction with local derma and fat pedicle flaps, 26; anesthetic complications in, 98; exposure and natural fixation of split-thickness skin grafts, 126; problem of outstanding ear, 224; flap grafts to upper extremity, 224; versatile cross-finger pedicle flap, 224; problems of surgical repair of cleft palate, 331; surgical approaches to bilateral cleft lip problem, 331; problem of implants in rhinoplasty, 340; cross-finger flaps in digital injuries with notes on Kirschner wire fixation, 340; statistical study of malignancies found before, during, or after routine breast plastic operations, 341; neurofibromatosis (Von Recklinghausen's disease) of head and neck, cosmetic and reconstructive aspects, 417; saddle nose and L-shaped graft, 420; local pedicle flaps in traumatic amputations of finger tip, 427; anatomic and physiologic acclimatization of tissue transplanted by lip switch technique, 532; determination of viability of pedicled tubular skin grafts, 532
Pleura, Treatment of malignant effusions of, by talc poudrage, 132; needle biopsy of, 229; drainage of, with air replacement as management of cavity of, following pulmonary resection, 537
Pneumopericardium, Diagnostic; its clinical application, 99
Pneumothorax, Surgical treatment of spontaneous, 130; contralateral, after pneumonectomy for carcinoma, 132
Poliomyelitis, And pregnancy, 267; use of stored skin in plastic correction of scoliosis secondary to, 306
Polyps, Inflammatory gastric (eosinophilic granulomas of stomach), 139; familial polyposis limited to females of one family for 3 generations, 145; of colon in childhood, 252; juvenile, of colon, 449
Polyurethane foam, Its use in fractures and diseased bones, 379; internal fixation of fractures by means of, 379; chemical osteosynthesis of fractures and nonunions of shafts of long bones of lower extremity, 488
Portal vein, Assessment of results of surgical treatment in portal hypertension, 52; effect of pituitrin on hypertension of portal system, 151; conditions under which portacaval shunting is effective, 253; surgical treatment of portal hypertension, 258; indications for portasystemic anastomosis, 360; diagnostic study of portal venous system, 360; portacaval shunt operation in patients with cirrhosis and ascites, 453; splenoportography in children, 504; splenoportography in treatment of hematemesis, 505
Pregnancy, Exfoliative cytology during, for detection of carcinoma of cervix, 60; after tuberculosis of fallopian tubes, 62; value of pregnanediol excretion test in prognosis of abortion, 65; perineal anesthesia in primiparas; analysis of 550 cases, 65; placental infarction, 65; clinical forms of amniotic embolism, 65; hematoma of umbilical cord, 66; fetal death before onset of labor; analysis of 407 cases, 66; ectopic, associated with arteriovenous fistula, 67; abdominal, with full term, living eutrophic fetus, 67; effect of, on course of rheumatic heart disease; 25 year study, 67; carcinoma of breast associated with, or lactation, 127; globulin bound iodine levels in normal and abnormal, 161; associated with congenital malformations of reproductive tract, 162; hyperthyroidism and, 162; advanced ectopic, 163; estriol excretion in intrauterine fetal death, 163; further studies on urinary estriol excretion during, and its significance for estimation of placental function and dysfunction in advanced, 163; colpocytologic study in cases of threatened abortion during first trimester of, 164; carpal tunnel syndrome in, 185; rupture of congenital intracranial aneurysm in, 219; mitral commissurotomy in, 239; after radical vulvectomy for carcinoma of vulva, 263; fetal erythrocytes present in maternal circulation before and after delivery, 263; automatic exposure device for roentgen diagnosis in, 264; and birth of twins, 264; elderly primigravida, 264; fertility after conservative surgery in tubal, 264; unexplained vaginal bleeding during, 265; supine hypotensive syndrome of late, and premature separation of placenta, 266; volvulus associated with, 267; poliomyelitis and, 267; studies on dihydrostreptomycin administered to pregnant and transferred to their fetuses, 289; collum carcinoma during, 367; value of routine cytologic smears in, 369; and appendicitis, 369; significance of engagement of fetal head in Puerto Rican primiparas, 370; relationship between labor and delivery and mechanism of fetal oxygenation in normal obstetric patient, 371; relation between physiologic icterus of prematurity and late toxemia of, 372; lumbar disc protrusions in, 426; gallstones and; composition of gallbladder bile in pregnant woman at term, 454; measurements of vasopressinase in maternal and cord blood, 465; teen-age, 466; consideration of treatment of elderly primigravidas, 467; disturbances of bladder function in relation to, 467; acute appendicitis in, 467; appendicitis during, 467; management of eclampsia, 468; perinatal mortality of infants of diabetic mothers, 468; potentiality of liquor amnii, 468; significance of tubal, in reproductive life of women, 470; and delivery following extensive vulvectomy, 470; problem of delivery after previous cesarean section, 470; treatment of tubal, 471; hematoma of rectus abdominis muscle in, 541; human placenta, 549; labor and puerperium in very young primiparas, 549
Pregnanediol, Excretion of, in suspected placental insufficiency, 266
Progesterone, Clinical aspects of metabolism of, 365; protracted administration of new synthetic progestative, 365
Prostate, Problem of decreased alkaline serum phosphatase, 71; calculosis of, 169; cytology of, in diagnosis of cancer, 169; bilateral orchiectomy in treatment of carcinoma of, 273; late results of prostatectomy for benign hyperplasia of, 273; estrogen treated cancer of, 373; clinical application of diphenylthiocarbazone (dithizone) in carcinoma of, 407; evaluation of serum and acid phosphatase in diseases of, especially in carcinoma of, 475; cytological diagnosis of tumors of, by transrectal aspiration biopsy, 475; cancer of; in-

curable cancer after conservative surgery of, for clinically benign obstruction, 551; carcinoma of, presenting as disease of rectum, 551

Prostatectomy, Anesthetic technique for, 71; late results of, for benign prostatic hyperplasia, 273; retropubic, using no catheter technique, 475; results of 104 prostatectomies in patients with coexisting cardiovascular disease, 551

Prosthesis, Of plastic for trachea and esophagus, 28; strip graft technique, 86; hemodynamics of vascular transplants, 86; experimental study of polyvinylformal (ivalon) sponge as substitute for tissue, 102; ossicular repositioning and ossicular, in tympanoplasty, 113; transplantation of big vessels with aid of removable metallic, 187; blood vessel conservation using new synthetic material, 188; marlex mesh as, in repair of thoracic wall defects, 227; amputations and artificial limbs, 281; effect of specific compression on soft tissue response to formalinized polyvinyl alcohol (ivalon) sponge, 306; partial replacement of mitral valve with synthetic fabric, 538; complete replacement of mitral valve, 538; review of 48 cup and 65 acrylic hip arthroplasties, 557; experimental development of alloplastic vascular, and its clinical use, 561

Proteins, Late results and studies of, after partial gastrectomy, 45; studies on serum glucoproteins after surgical operations, 287; postoperative alterations of serum, in neurosurgical patients, 334

Puerperium, Suppression of lactation; double blind hormone study, 69; intractable uterine hemorrhage due to abnormal subendometrial blood vessels after childbirth and miscarriage, 270; etiology of breast abscess in, 340; postpartum hemorrhage, 472; pregnancy, labor, and, in very young primiparas, 549

Pulmonary valve, Pulmonic stenosis in first year of life, 134

Pylorus, Obstruction of adult, due to mucosal diaphragm, 40; stenosis of, in premature infants, 351

RADIATION, Effect of whole body, and infection on arterial replacement, 188; diagnosis of injury from, and analysis of human lethal dose of, 202; therapy for cervical cancer, 260; treatment of carcinoma of middle ear by 4 MV linear accelerator, 300; wedge filter approach with 4 MV, to treatment of carcinomas of alveolus and antrum, 300; effect of, upon heart, 300; effects of, on heart, 300; evaluation of response to, 403; cellular aspects of tumor therapy, 403; and leukemia in carcinoma of cervix, 404; internal mammary lymph node biopsy as guide to postmastectomy therapy with, in breast carcinoma, 429; surgery for injury from, 506

Radioactivity, Preoperative and postoperative mediastinal infiltration with suspension of radioactive chromium phosphate in treatment of bronchogenic carcinoma, 32; interstitial radioactive colloidal gold therapy of lateral pelvic nodes in carcinoma of uterine cervix, 61; albumin tagged with iodine 131 in localization of placental site, 64; use of radioisotopes for localization of placental site, 64; treatment of papillomas of bladder with radioactive colloidal gold (Au^{198}), 75; thyroidectomy for hyperthyroidism following unsatisfactory response to radioiodine treatment, 119; sensitivity of brain tumors to radiation and late cerebral radiation necrosis, 122; diagnosis of gastrointestinal bleeding site by use of radiochromate tagged red cells, 144; quantitative determination of gastrointestinal bleeding using Cr^{51}-labeled red blood cells, 144; diagnosis of thyroid cancer with radioactive phosphorus, 202; radioactive hypaque renogram in acute renal obstruction, 276; surgery and strontium 90 in treatment of pterygium, 327; ocular complications of transsphenoidal yttrium 90 hypophysectomy, 336; radiolymphadenography, method to investigate functional dynamics of lymphatic system, 494; hypophysial implantation of radioactive gold in treatment of cancer of breast, 528

Radium, Treatment of carcinoma of penis with, 72; interstitial implantation of needles of, in treatment of carcinoma of penis, 552

Radius, Treatment of recent fractures of upper end of, 177; fractures of proximal metaphysis of, in childhood and in adolescence, 177; long term results of fractures of proximal, 380

Recklinghausen's disease, Neurofibromatosis of head and neck, cosmetic and reconstructive aspects, 417

Reconstructive surgery, Reconstruction of thumb, 177; of thumb, 178; cervical phase of antethoracic esophageal reconstruction utilizing terminal ileum and ascending colon, 241; of hand by local transfer of composite tissue island flaps, 224; use of colon and other organs for, of esophagus in patients with cancer, 349; esophageal intrapleural, with small and large intestine, 441

Rectum, Rationale of re-resection for recurrent cancer of colon and, 50; management of prolapse of, 50; adenocarcinoma of; 15 year study with evaluation of results of curative therapy, 51; sexual dysfunction as complication of abdominoperineal resection of, in male, 51; treatment of anorectal malignant melanoma, 150; anterior or total pelvic exenteration in advanced cancer of uterine cervix or, 159; urinary disturbances after radical surgery for malignant tumors of, 253; rectal complications of inflammatory disease of small and large bowel, 359; abdominoperineal amputation with perineal colostomy, 359; subtotal colectomy with cecorectal anastomosis for multiple adenomas of colorectum, 451; adenomas of colon and, in children, 451; abdominopresacral resection for selected lesions of, 451; curability of cancer of, 451; anorectal tuberculosis, 452; diagnostic accuracy of barium enema study in carcinoma of colon and, 505; carcinoma of prostate presenting as disease of, 551

Respiration, Respiratory response to inhaled carbon dioxide, 7 per cent; indication of pulmonary emphysema, 231; adaptive changes in immediate postnatal period, with particular reference to, 270; circulatory factors in relation to idiopathic respiratory distress, hyaline membrane disease, in newborn, 270; mechanical ventilatory assistance in thoracic surgery, 344; effects of vagal blockade on respiratory work in hypothermic animal, 395; failure of; relation between oxygen concentrations of inspired air and arterial blood, 432; prognostic value of catheterization of right side of heart preceding pneumonectomy in presence of insufficiency of, 432; chemical stimuli of, in early neonatal period, 473; method of controlled oxygen administration which reduces risk of carbon dioxide retention, 502

Respiratory tract, Physiologic factors affecting airway resistance in normal subjects and in patients with obstructive respiratory disease, 129; cultured human respiratory epithelium; its use in comparison of cytotoxic properties of local anesthetics, 399; pathogenic staphylococci in upper, 499

Resuscitation, Rescue breathing for partly drowned, 228; expired air, 228; intra-aortic transfusion of oxygenated blood and endotracheal insufflation of oxygen in, of severely anoxic newborn lambs, 271

Retina, Surgical management of detachment of; collective review, 205; central artery of, 328; clinical experience with photocoagulator, 329; hemorrhages in, in newborn, 372; collection, storage, and selection of human vitreous for use in surgery of detachment of, 417

Retroperitoneum, Primary tumors of, 244
Roentgenography, Transsternal phlebography of internal mammary veins, 26; selective bronchography, 28; 5 year follow-up of detected lung cancer suspects by, 33; in differential diagnosis between perforated ulcer and acute pancreatitis, 42; appendicitis, sterility, and hysterosalpingography, 47; early surgical treatment of acute cholecystitis; necessity of operative cholangiography, 53; late results of 300 cholecystectomies performed with aid of operative radiomanometry, 54; arteriographic examination in obstetrics, 64; laryngography with opaque contrast medium, 99; diagnostic pneumopericardium, its clinical application, 99; coronary arteriography, 99; splenoportography, 100; new technique for thoracic myelography, 123; laminagraphy of chronic bronchitis and bronchiectasis with bronchographic and angiopneumographic control, 129; study of gallbladder evacuation following nonbiliary surgery by, 152; diagnosis of increased splenic volume, 157; pelviureteric junction, cinepyelography study, 172; phlebography of femoral head in fresh fractures of medial femoral neck portion, 180; value of peripheral arteriography in assessing acute vascular injuries, 187; discography, 199; aspects of stab wounds of chest, 199; advanced skeletal changes in hyperparathyroidism, 199; spontaneous rejection of gangrenous segment of left side of colon as complication of aortography, 199; tomography in intravenous cholangiography, 200; treatment of incidents occurring during cholangiography with biligrafin, 200; splenoportography, 200; pelvic arteriography in study of gynecologic disease, 201; presacral retroperitoneal pneumography combined with pyelography, 201; localization of stones in renal drainage system by means of planigraphy, 201; intraosseous phlebography, 201; particular angiographic sign in meningiomas of tentorium; artery of Bernasconi and Cassinari, 219; relationship of hyperinflated lung to obstructive pulmonary disease, 231; coronary arteriography, 236; choledochoscopy versus cholangiography, 254; oral cholangiogram, 254; automatic exposure device for obstetric diagnosis by, 264; excretory urogram as kidney function test, 275; radiation hazards in diagnosis by, 295; tumor localization with transverse tomography, 295; hazards of diagnostic, in obstetrics and gynecology, 295; intraosseous vertebral plexus venography, 295; gastric carcinoma; accuracy of radiologic diagnosis, 296; pyloric antral mucosal diaphragm with transpyloric mucosal prolapse, 296; mesenteric vascular disease, 296; findings on plain roentgenograms of abdomen associated with mesenteric vascular occlusion with possible new sign of mesenteric venous thrombosis, 297; gastrointestinal carcinoid tumors, 297; simple distal ileal obstruction, 297; diagnostic, of regional ileitis, 297; findings in severe pseudomembranous enterocolitis, 298; percutaneous transhepatic cholangiography, 298; intravenous cholangiography in diagnosis of acute cholecystitis, 298; reactions associated with intravenous urography, 298; phlebography of lower extremity, 299; cerebral angiography in diagnosis of acute stroke, 333; larger volume pantopaque lumbar myelography, 336; of giant fibroadenoma of breast, cystosarcoma phylloides, 341; intravenous cholangiography in differential diagnosis of acute cholecystitis, 360; new physiologic aspects of reflux into duct of Wirsung during operative cholangiography, 362; abdominal phlebography in urologic diagnosis, 376; angiography, 385; some aspects of ischemia of brain, 401; diagnosis of tumors of corpus callosum, 401; subarachnoid cisterns, 401; brachial vertebral angiography, 401; localization of bullets and metallic fragments in cardiovascular system, 402; cinefluorographic detection and recording of calcifications within heart, 402; percutaneous splenoportal venography with additional comments on transhepatic venography, 402; splenomanometric and transparietal splenoportographic studies in Central Africa, 402; diagnosis of gynecologic tumors, 403; evidence of bone changes after injuries by electric current, 403; vertebral angiography in tumors of posterior fossa, 425; diagnosis of blunt chest trauma with, 431; experiences with angiography as guide to mediastinal exploration, 441; intravenous cholangiography in biliary tract disease, 454; voiding urethrography, integral part of intravenous urography, 481; indications and contraindications for various methods of abdominal aortography, 493; x-ray projections of anatomic structures in cervical and lumbar vertebrae, 503; left ventricular and systemic arterial catheterization, 503; intraosseous venography, recent modification in technique, 503; marrow embolism and intraosseous contrast radiography, 504; prolapse of gastric mucosa into duodenum, 504; stratigraphic studies of abdominal neoplasms, 504; splenoportography in children, 504; diagnostic accuracy of barium enema in carcinoma of colon and rectum, 505; percutaneous transhepatic cholangiography, 505; intravenous cholangiography with sodium iodopamide, problem of nonvisualization, 505; roentgen diagnosis of intracranial incisural space-occupying lesions, 525; roentgenograms of male urethra during micturition, 554; role of diagnostic, in medicine, 571; in differential diagnosis of recurrent vomiting in early infancy, 571; angiography of internal carotid with use of catheter technique, 571; costal intraosseous venography, aid in management of intrathoracic neoplasia, 572; faulty contrast medium injection in percutaneous ventricular puncture, 572
Roentgenotherapy, Evaluation of, in management of nonresectable carcinoma of lung, 33; present health of children given, to anterior mediastinum in infancy, 136; remission of Graves' disease following, of pituitary neoplasm, 202; physical studies on short-treatment-distance cesium 137 teletherapy unit, 299; in treatment of tumors of pituitary gland, 425; 5 year cure in case of malignant hemangioendothelioma of bone treated with, 483; 82 cases of mammary cancer treated exclusively with, 533; results of, in inoperable cases of lung cancer, 572

Salivary glands, Sialography and surface anatomy of parotid duct, 18; acute postoperative parotitis, "surgical mumps," 18; as endocrine organs, 116; papillary cystadenoma originating in minor, 117; neoplastic infiltration of aponeurosis in mixed tumors of parotid, 217; cylindromas, 331; tumors of minor, 421
Sarcoidosis, 306
Sarcoma, Of head and neck in childhood, 20; of small intestine; report of 3 pathologic types, 147
Scapula, Primary tumors of, 380; fractures of, 485
Scoliosis, Use of stored skin in plastic correction of, secondary to poliomyelitis, 306
Shock, Use of hypothermia in septic, 95; vascular collapse complicating septic abortion, 165; metabolic effects of infusion of protein hydrolysate in experimental, in dogs, 203
Sigmoid, Surgical treatment of diverticulitis of, 50
Sinuses, Carcinoma of antrum, 216
Skin, Dermal planing, 25; epithelioma of, study of 853 lesions, 25; treatment of 126 cases of malignant melanoma, 26; progressive postoperative necrosis of, 92; basal cell cancer in children and young adults, 125; tumors of neuromyoarterial glomus, 125; congenital absence of, 223; dermatofibrosarcoma protuberans, 223; use of stored, in plastic correction of scoliosis

secondary to poliomyelitis, 306; matching facial color with split thickness grafts of, from adjacent areas, 339; phosphatase activity in pedunculated flaps of, 339; pathogenesis and management of chronic ulcerations of extremities, 339; neurofibromatosis (Von Recklinghausen's disease) of head and neck, cosmetic and reconstructive aspects, 417; transfer of free composite grafts of fat and, 531; gangrenous lesions of, associated with chronic ulcerative colitis, 531

Skull, Covering of large bone defects of, with refrigerated bone transplants, 177; fractures of; ophthalmologic significance, 215

Smears, Value of routine cytologic, in pregnancy, 369

Snake bite, Ineffectiveness of suction in removing snake venom from open wounds, 287; experimental evaluation of methods for early treatment of, 392

Speech, Vocal rehabilitation by autogenous vein graft, 18

Spinal cord, New technique for thoracic myelography, 123; little known form of traumatic tetraplegia, 337; effects of posterior root section on activity of some muscles in man, 337; management of bladder in congenital lesions of, 378; alcoholic subarachnoid neurolysis, 529

Spine, Paralysis and course of tuberculous spondylitis, 78; vascular anatomy of, and its relationship to pyogenic vertebral osteomyelitis, 78; pathologic fractures of; etiology and diagnosis, 79; correlation of myelogram with clinical and operative findings in lumbar disc lesions, 123; broadening of lumbosacral root sheaths, 123; clinical observations and evaluation of conservative treatment of acute low back pain due to disc lesion, 178; discography, 199; anterior fusion of, for treatment of tuberculosis of, 282; larger volume pantopaque lumbar myelography, 336; discographic study of ruptured lumbar intervertebral discs, 336; indications and techniques for early stabilization of neck in some fracture dislocations of cervical, 379; constitutional changes in vertebral neural arches, 381; lesions of vertebral column in tetanus in child, 395; congenital malformations of medium and lower thirds of cervical, 424; surgical approach to thoracic intervertebral disc protrusions, 425; lumbar disc protrusions in pregnancy, 426; pyogenic osteomyelitis and arthritis of, treated with combinations of antibiotics and gamma globulin, 484; surgical treatment of spondylolisthesis, 484; developmental posterior enteric remnants and malformations of, 528; Luschka's joint, degenerative phenomenon, 557; direct approach to Pott's disease, 557

Spleen, Experimental splenectomy, wound healing, and transplantation, 58; splenoportography, 100; effects of experimental splenectomy on erythrocyte regeneration, leucocyte regulation, and hemorrhagic shock, 157; posterolateral approach for splenectomy, 157; radiologic diagnosis of increased volume of, 157; splenectomy and splenic artery ligation in treatment of ascites associated with cirrhosis, 158; splenoportography, 200; surgical treatment of portal hypertension, 258; giant follicle lymphoma of, 363; traumatic rupture of, 364; percutaneous splenoportal venography with additional comments on transhepatic venography, 402; splenomanometric and transparietal splenoportographic studies in Central Africa, 402; nonpenetrating injuries to, 443; rupture of, 460; splenectomy in idiopathic pancytopenia with anemia and without clinical splenomegaly, 460; postsplenectomy infection in infants and children, 499; splenoportography in treatment of hematemesis, 505; laparoscopic diagnosis of hemoperitoneum caused by traumatic rupture of, 546; overwhelming infection in children following splenectomy, 546

Staphylococci, Effect of combinations of antibiotics on coagulase-positive, 93; increased transmissibility of, to patients receiving antimicrobial drug, 290; from air borne fibers in hospital ward, 290; bacteriophage typing of, 330; drug usage and antibiotic susceptibility of, 395; pathogenic, in upper respiratory tract, 499; problem of management of nasal carriers of staphylococci, 499; pneumonitis due to, in postoperative patient, 535; wound infection due to, in surgical unit, 565; pathogenicity of; community and hospital, 566

Stein-Leventhal syndrome, Limitations of, report of 6 patients with amenorrhea and menstrual disorders treated by ovarian wedge resection, 59

Stereotaxis, Significance in human stereotactic brain surgery of individual variation in diencephalon and globus pallidus, 22; surgical and stereotaxic hypophysectomy for cancer, 221; radiofrequency lesions in central nervous system of man and cat, including case reports of 8 bulbar pain-tract interruptions, 335; technique of, 335; treatment by, of deep intracerebral vascular malformations, 336

Sterility, Appendicitis, and hysterosalpingography, 47; cortisone and its derivatives in treatment of, 67

Sternum, Congenital anomalies of, and their treatment, 129

Steroids, Effect of gonadal, on bone and their use in treatment of fractures; collective review, 1; hydrocortisone and carpal tunnel syndrome, 185; antagonism and synergism of hormonal, 463; effect of testosterone on corticosteroids in surgical trauma, 497; prevention of adhesions by intra-abdominal instillation of prednisolone acetate, 541; corticosteroids in preoperative medical management of ulcerative colitis, 565

Stoma, Transthoracic vagotomy for ulceration of, 40

Stomach, Contributions of pathologist to present day concepts of ulcer of, 40; gastroduodenal ulcer and Pean-Billroth operation, 41; role of antrum in surgical treatment of peptic ulcer, 42; peptic ulcer perforated into peritoneal cavity, 42; results of surgical treatment of perforated peptic ulcer, 43; comparative evaluation of treatment of perforated ulcers of duodenum and, 43; precancerous disease of, 43; study of 42 cases of carcinoma in situ and small carcinoma of, 44; statistical study of 324 operable cancers of, 44; leiomyosarcoma of, 44; acute phlegmonous gastritis, 139; inflammatory polyps of eosinophilic granulomas of, 139; observations on blood group distribution in peptic ulcer and cancer of, 139; cytologic diagnosis of cancer of, and evaluation of abrasive brush technique in 125 cases, 141; carcinoma of, 141; carcinoma of, in young adult, 141; topical acidity in comparison with uropepsin secretion in ulcer and carcinoma of, after resection of, 142; effect of antrectomy, vagotomy with gastrojejunostomy, and antrectomy with vagotomy on spontaneous and maximal gastric acid output in man, 142; acute complications following transabdominal resection of, 143; late development of cancer of, after gastrectomy for malignant disease, 143; gastrodialysis in treatment of acute renal failure, 172; local hypothermia of, in treatment of massive upper gastrointestinal hemorrhage, 246; atrophic gastritis as possible precursor of gastric carcinoma and pernicious anemia, 247; carcinoma of, 247; gastric flow and acidity before and after Billroth II and Billroth I for gastroduodenal ulcer, 247; vagectomy, hemigastrectomy, and gastroduodenostomy in treatment of duodenal ulcer, 248; idiopathic perforation of, in newborn, 271; carcinoma of; accuracy of radiologic diagnosis, 296; pyloric antral mucosal diaphragm with transpyloric mucosal prolapse, 296; strangulated diaphragmatic hernia with gangrene and perforation of, 350; subdiaphragmatic fundusectomy, 351; study

of role of pylorus in prevention of dumping syndrome, 353; duplications of, 444; lesions of, including exfoliative cytology, 444; temporary gastrostomy in pediatric surgery, 445; surgical therapy of cancer of, 446; perforation of, in newborn caused by congenital defects of musculature of, 473; prolapse of mucosa of, into duodenum, 504; value of gastric cytology in benign affections of, 542; various operative methods in surgical treatment of carcinoma of, 542

Streptomycin, Studies on dihydrostreptomycin administered to pregnant and transferred to their fetuses, 289

Succinylcholine, Effect of, on intraspinal fluid pressure, 97

Surgery, reparative, Of head and neck cancer, 15; operative wound seeding with tumor cells; its role in recurrences of head and neck cancer, 20; bronchospirometric determinations during open chest, 29; selective bronchial blockage during resectional pulmonary, 29; late results of Heller's operation for cardiospasm, 37; problem of distention in low small intestinal obstruction with special reference to its management at operation, 48; preoperative factors in production of cardiac arrest, 91; use of hypertonic levulose in medical and surgical patients, 91; progressive postoperative skin necrosis, 92; sepsis in; analysis of factors associated with sepsis in 2 operative procedures, 1937 to 1957, 94; effect of early ambulation on incidence of postoperative complications of cataract, 112; swallowing dysfunction associated with radical, of head and neck, 116; replacement of blood loss during surgical procedures with blood collected in citrate phosphate dextrose solution, 191; postoperative changes in blood coagulation in elderly patients, 192; parenteral fluid therapy for children undergoing major abdominal; study of 120 consecutive cases, 193; fat emulsions for clinical intravenous therapy, 193; postoperative renal dysfunction, 193; serious, in aged, 194; influence of clorpactin WCS-90 on bacterial complications of, 194; electrocardiogram during anesthesia and, 196; fatalities in anesthesia and, 197; circulatory changes due to open pneumothorax in patients undergoing, 230; injuries of biliary ducts during operation, 255; studies on serum glucoproteins after surgical operations, 287; prophylactic use of anticoagulants in postoperative patients, 287; thrombophlebitis following intravenous infusion, 287; albumin catabolism in burns and following surgical procedures, 287; influence of surgical operations on ferment activity of enzymes, 302; postoperative alterations of serum proteins in neurosurgical patients, 334; pulmonary function in immediate postoperative period, 344; appraisal of routine postoperative use of pantothenyl alcohol for prevention of intestinal atony, 354; postoperative pancreatic fistula, 363; disinfection of hands of surgeons and nurses, 391; renal excretion of water in infants immediately following operations; surface surgical procedures, 392; treatment of postoperative gas pains, 392; bacterial wound complications after aseptic and conditionally aseptic operations, 393; development of new fibrinolytic enzyme and its use in surgical lesions, 393; serum glutamic oxalacetic transaminase levels in 266 patients undergoing, 497; effect of testosterone on corticosteroids in trauma of, 497; sepsis in, report on subtotal gastrectomies, 497; hyperthermia after surgical operation in infants and children, 498; prevention of postoperative edema, 499; studies on prevention of implantation of cancer at operation, 507; staphylococcal pneumonitis in postoperative patient, 535; bone formation in laparotomy scars, 555; corticosteroids in preoperative medical management of ulcerative colitis, 565; evaluation of drugs used for oral premedication of children, 565

Talipes, Treatment of, in children between ages of 2 and 5 years, 84

Temperature, Failure in regulation of, during progressive dehydration, 302; comparative thermoelectrical measurements of organ, blood, and tissue, in hypothermia in surface and bloodstream cooling, 396

Tendon, Heterogenous and autogenous transplants of, 83; treatment of extensor, of fingers, 183; repair of extensor mechanism of hand, 184; grafts of, 184; carpal tunnel syndrome in pregnancy, 185; hydrocortisone and carpal tunnel syndrome, 185; results of tenotomy of tendo Achillis in intermittent claudication, 185; management of injuries of flexor, 283; locked middle finger, 383; some observations on reaction of bone and, after tunneling of bone and insertion of, 384; further studies on application of monomolecular cellulose filter tubes to create artificial sheaths of, in hand and wrist, 384; primary repair of flexor, 489; digital flexor; significance of gap occurring at line of suture, 489; tuberculous tenosynovitis of hand, 489; benign synovioma, new criterion of classification, 489; posttraumatic ruptures of musculus extensor pollicis longus, 490; ruptures of flexor, in forearm and hand, 559; homologous composite tissue grafts of digital flexor mechanism in human beings, 574

Test, Value of pregnanediol excretion, in prognosis of abortion, 65; evaluation of pharmacologic and chemical, as aid to diagnosis of pheochromocytoma, 76; evaluation of serum amylase levels in nonpancreatic disease, 138; combined secretin and cytology, in diagnosis of pancreatic and biliary tract cancer, 362; reliability of serum amylase determination, 456

Testes, Tuberculous epididymitis, 169; etiology of idiopathic hydrocele, 169; clinical, morphologic, and biochemical studies of virilizing tumor in, 170; nuclear sex of tumors of, and some related ovarian and extragonadal neoplasms, 170; seminoma of, 274; tumors of, 274; undescended; surgical anatomy of spermatic vessels, spermatic surgical triangles, and lateral spermatic ligament, 373; treatment of varicocele by high ligation, 374; volvulus of ectopic, 374

Tetanus, Prophylaxis of, 92; in children, 93; in African children, 93; total paralysis regimen in severe, 195; clinical experiences in treatment of, 394; lesions of vertebral column in child with, 395

Thoracic duct, Role of, in metastases of abdominal tumors, 388

Thorax, Simple method of stabilization for severe crushing injuries of, 27; radiologic aspects of stab wounds of, 199; marlex mesh as prosthesis in repair of defects of wall of, 227; on rare congenital deformities of wall of, 227; injuries of, 227; discontinuous resection of cartilage in treatment of progressive rib cartilage necrosis, 228; chest wall tumors, 228; cardiac injury due to nonpenetrating trauma of, 237; surgical treatment of pectus excavatum by costosternoplasty with rib strut, 343; thoracoplasty combined with partial scapulectomy, 343; mechanical ventilatory assistance in surgery of, 344; intrathoracic reduplication cysts, 349; roentgenographic diagnosis of blunt trauma of, 431; experimental studies on closed trauma of, 431; costal intraosseous venography, aid in management of intrathoracic neoplasia, 572

Thrombosis, And pulmonary embolism of right side of heart, 31

Thumb, Reconstruction of, 177; reconstruction of, 178; functional rehabilitation of, in ulnar palsy, 383

Thymus, Long term follow-up of 32 patients irradiated for enlargement of, in infancy, 100; present health of children given x-ray treatment to anterior mediastinum in infancy, 136; tumors of, 441; tumors of, 441; surgical significance of, 539

Thyroid gland, Diagnosis of cancer of, 18; papillary tumors of, 19; hyperfunctioning carcinoma of, 19; thyroidectomy for hyperthyroidism following unsatisfactory response to radioiodine treatment, 119; operative goiter series, composition and complications, particularly recurrent nerve paralysis, 119; hyperthyroidism and pregnancy, 162; diagnosis of cancer of, with radioactive phosphorus, 202; disease of, in Missouri, 218; management of child with carcinoma of, 218; carcinoma of, in association with struma lymphomatosa, Hashimoto's disease, 218; radioactive iodine studies in diagnosis of Hashimoto's thyroiditis, 301; use of radioactive iodine in evaluation of nodules of, 301; ocular manifestations of thyrotoxicosis and thyrotropic or progressive exophthalmos, 330; treatment of hyperthyroidism, 332; thyroiditis and cirrhosis of liver, 360; subacute granulomatous thyroiditis, 422; polymorphous cell tumor of, 422; malignant adenoma of, 423; present day management of nodules of, and malignancy, 423; carcinoma of, 524

Thyrotropin, Repair of experimental fractures under action of growth hormone and cortisone, 77

Tibia, Modern trends in treatment of closed fractures of shaft of, study based on 260 cases, 82; treatment of torsion fractures of, 181; interfragmentary diastasis in fractures of tibial malleolus, 181; conservative treatment of compression fractures of distal end of, 382; treatment of nonunions of, with loss of substance, 488; treatment of closed fractures of diaphysis of fibula and, 559

Tobacco, Effect of snuff and, on production of oral carcinoma, 507

Toes, Hallux rigidus, 181; technique of digital arthroplasty and arthrodesis of hammer, 559

Tomography, In intravenous cholangiography, 200; value of, in management of pulmonary tuberculosis, 433

Tonsils, Facility in tonsilloadenoidectomy management, 523

Trachea, Detailed surgical technique of fenestration of, with report of 26 cases, 27; tracheoesophageal fistula and esophageal atresia, 28; plastic prostheses for esophagus and, 28

Tracheostomy, Widening scope of; analysis of 400 cases, 27; neurosurgical applications of, 535; complications of, 535

Transplants, Experimental splenectomy, wound healing, and transplantation, 58; heterogenous and autogenous tendon, 83; hemodynamics of vascular, 86; covering of large bone defects of skull with refrigerated bone, 177; bone transplantation, 183; technique of bone marrow, in man, 203; some observations on treatment of postirradiation hematopoietic depression in man by infusion of stored autogenous bone marrow, 204; homotransplantation of dog jejunum, 305; immunochemical analysis of experimental corneal, 328; donor-type lymphatic tissue cells in lethally irradiated mice treated with homologous fetal liver, 407; preliminary studies on, of supercooled hearts, 407; first report of renal homotransplant from sister to nontwin brother, 408; specificity of skin homograft rejection in man, 508; homografting of sympathectomized skin in humans, 508; homotransplantation of endocrine tissues in diffusion chamber, 509; transplantation of homologous parathyroid gland in treatment of chronic tetany, 509; homologous cardiac, in dogs, 509; successful homotransplantation of kidney between nonidentical twins, 509; irradiation and marrow transplantation, 510; tissue bank, 574

Trauma, Simple method of stabilization for severe crushing injuries of chest, 27; postpericardiotomy syndrome following penetrating stab wounds of chest; comparison with postcommissurotomy syndrome, 36; approach to stab wounds of neck, 120; diabetes insipidus after, 121; blunt abdominal, 137; abdominal visceral injury due to nonpenetrating, 137; aortic rupture after blunt thoracic, 189; radiologic aspects of stab wounds of chest, 199; injuries of thorax, 227; cardiac injury due to nonpenetrating chest, 237; gunshot wounds of heart, 237; blunt, of abdomen, 243; indications for operation in abdominal, 243; significance of reducible inguinal hernia in closed abdominal injuries, 243; shell fragment injuries of kidney, 275; healing of renal wounds; surgical repair of contusions and lacerations, 275; endotracheal anesthesia and, incident to endotracheal intubation, 292; emergency treatment cart in modern hospital, 294; nonperforating eye injuries with hyphema, 327; different concept of volume replacement in hypovolemia due to, 391; surgical considerations of nonpenetrating abdominal injuries, 443; nonpenetrating injuries to spleen, 443; anesthetic management of patients with, 501; soft tissue injuries of cervical region; collective review, 511; role of, in pathogenesis of temporomandibular joint arthrosis, 524; heroic treatment of acute head injuries, 526; renal, 553; amputations of lower extremity in emergency surgery, 564; effects of proteolytic enzymes on human serum, 565

Tuberculosis, Resection for pulmonary, in infants and children, 31; residual lesion in pulmonary, requiring surgery; review of 100 sputum-negative patients consecutively operated on, 32; of fallopian tubes, pregnancy after, 62; gynecomastia of pulmonary, 126; tuberculous empyema, 130; resectional therapy for pulmonary; evaluation of technique of reconstitution of lungs in segmental sections, 131; tuberculous epididymitis, 169; late results of resection of kidney in renal, 171; kanamycin treatment of urinary, 172; current therapy in pulmonary, 233; bronchitis deformans in pulmonary, 234; pneumonectomy for; evaluation of 124 cases, 234; cystic cavitation following chemotherapy of acute, 234; development of efficient chemotherapy for renal, 275; anterior spine fusion for treatment of spinal, 282; treatment of renal, 375; value of tomography in management of pulmonary, 433; surgical resection in pulmonary, due to atypical mycobacterium, 433; development of bronchogenic carcinoma in patients with pulmonary, 434; tuberculous peritonitis, 443; anorectal, 452; earliest signs and symptoms in 127 male patients with genitourinary tuberculosis, 478; tuberculous tenosynovitis of hand, 489; of mesenteric and retroperitoneal lymph nodes simulating neoplasm, 494; choice of methods in treatment of pulmonary, 536; treatment of tuberculous lower lobe cavity, 536; surgery in management of pulmonary, 536

Tumors, Malignant, of head and neck, 19; study of 100 temporal lobe, 22; 853 cutaneous epitheliomas, 25; 12 fatal malignant peritoneal mesotheliomas, 39; primary lymphosarcoma of digestive tract, 44; leiomyosarcoma of stomach, 44; adenocarcinoma of rectum, 51; islet cell, of pancreas with chronic diarrhea and hypokalemia, 57; treatment of malignant chorioepithelioma, 62; treatment of papillomas of bladder with radioactive colloidal gold (Au^{198}), 75; metastasis of malignant, to adrenal gland, 76; presence of tumor inhibitory principle in livers, 101; transplantable human, in experimental chemotherapy, 101; surgical treatment of malignant, of ear and temporal bone, 114; solitary xanthoma of attached gingiva, 115; malignant, of upper jaw, 115; papillary cystadenoma of minor salivary gland origin, 117; early management in extensive cervical cystic hygroma and macroglossia, 119; sensitivity of brain, to radiation and late cerebral radiation necrosis, 122; of neuromyoarterial glomus, 125; carcinoid, 139; peptic ulcer diathesis

with mixed adenocarcinoma of pancreas, 140; further pathologic observations on syndrome of peptic ulcer and multiple endocrine, 140; of small intestine, 146; sarcomas of small intestine, report of 3 pathologic types, 147; of pancreatic islets, 156; Krukenberg's, study of 48 cases from registry of ovarian, 160; clinical, morphologic, and biochemical studies of virilizing testicular, 170; nuclear sex of testicular, and some related ovarian and extragonadal neoplasms, 170; mesenchymal hamartomas of kidney, 171; bladder papilloma, 173; partial cystectomy in malignant bladder, 173; total cystectomy for bladder, 174; recurrence of bladder, 174; hormonal activity of Grawitz's, of kidney, 176; neoplastic infiltration of aponeurosis in mixed parotid, 217; particular angiographic sign in meningiomas of tentorium; artery of Bernasconi and Cassinari, 219; of pontine angle, 219; cerebral microangiomas, 220; phyllode or mixed, of mammary gland, 225; of chest wall, 228; of lung and carcinoid syndrome, 234; choriocarcinoma of mediastinum, 241; mediastinal, 241; abdominal, in infants and children, 244; primary, of retroperitoneum, 244; urinary disturbances after radical surgery for malignant rectal, 253; benign neoplasms of gallbladder, 255; vaginal and uterine, in children, 261; ovarian, in premenarchal child, 261; ovarian neoplasms in children, 261; ovarian, in children, 262; seminoma of testis, 274; of testes, 274; amino, of bladder, 278; localization of, with transverse tomography, 295; nasopharyngeal malignant, 300; studies in autoimmunity of, 303; development of, in adrenalectomized rats given innoculations of aged tumor cells after surgical stress, 303; problem of malignancy in certain neoplasms often considered benign, 304; immediate skin grafting after orbital or orbital-sinus exenteration for malignant, 329; cylindromas, 331; facile exposure of facial nerve in removal of parotid gland, 331; parasagittal meningiomas of longitudinal sinus and phalanx, 335; host-tumor antagonism; apparently beneficial effects of acute concurrent infections or of toxin therapy on course of malignant melanoma, 339; roentgenography of giant fibroadenoma of breast, cystosarcoma phylloides, 341; primary malignant lymphoma of alimentary tract, 355; giant follicle lymphoma of spleen, 363; histogenesis of Krukenberg's, 368; endocrinologic study in patients with ovarian, 368; "functioning" ovarian, 368; hydatid mole and choriocarcinoma, 371; pheochromocytoma of urinary bladder, 378; primary, of scapula, 380; lymphangioma in infancy and childhood, 388; role of thoracic duct in metastases of abdominal, 388; roentgenologic diagnosis of corpus callosum, 401; cellular aspects of therapy of, 403; mammary duct stimulation by subcutaneous transplants of Ehrlich ascites, 406; influence of antibiotics on spread of colonic, 406; of minor salivary glands, 421; malignant thyroid adenoma, 423; teratoma of neck, 424; vertebral angiography in posterior fossa, 425; roentgen therapy in treatment of pituitary gland, 423; neurinoma, 426; treatment of angioma, 427; of thymus, 441; subtotal colectomy with cecorectal anastomosis for multiple adenomas of colorectum, 451; malignant, of penis and treatment, 476; partial nephrectomy in renal, 478; surgical treatment of bladder, 479; complications of irradiation of bladder, 480; 5 year cure in case of malignant hemangioendothelioma of bone treated with roentgen rays, 483; metastatic, of brain, 527; primary, of cerebellum, 527; pituitary, in Dunedin Neurosurgical Unit, 528; mammary sarcoma, 534; 10 cases of giant cell, 555

Ulcer, Transthoracic vagotomy for stomal, 40; contribution of pathologist to present day concepts of gastric, 40; of duodenum and high implantation of common bile duct, 41; gastroduodenal, and Pean-Billroth operation, 41; subtotal gastrectomy for bleeding, of duodenum in childhood, 41; role of antrum in surgical treatment of peptic, 42; contrast roentgenography in differential diagnosis between perforated, and acute pancreatitis, 42; peptic, perforated into peritoneal cavity, 42; results of surgical treatment of perforated peptic, 43; comparative evaluation of treatment of perforated, of stomach and duodenum, 43; review of Billroth I gastrectomy, 45; incidence of peptic, in chronic obstructive pulmonary emphysema, 139; observations on blood group distribution in peptic, and gastric cancer, 139; peptic ulcer diathesis with mixed adenocarcinoma of pancreas, 140; further pathologic observations on syndrome of peptic, and multiple endocrine tumors, 140; of second portion of duodenum, 140; segmental gastrectomy with innervated antrum for duodenal, 141; Polya gastrectomy with Y anastomosis in treatment of duodenal, 142; topical acidity in comparison with uropepsin secretion in, and carcinoma of stomach after stomach resection, 142; acute massive perforation of peptic, in infants, 246; "combined" operation for peptic, 246; gastric flow and acidity before and after Billroth II and Billroth I for gastroduodenal, 247; vagectomy, hemigastrectomy, and gastroduodenostomy in treatment of duodenal, 248; biliary lithiasis after partial gastrectomy for gastroduodenal, 254; blood groups of gastric carcinoma and, 286; vagotomy and drainage procedure for duodenal, 352; dumping after partial gastrectomy for duodenal, 353; surgical treatment of benign peptic, 445; intractable peptic, and endocrine adenomas with pituitary amphophilic hyperplasia, 445; vagotomy and small resection in treatment of duodenal, 446; true operative mortality in gastric resection for peptic, 446; acute postoperative, of gastrointestinal tract, 448; follow-up study of 127 patients with stomal, 448; operative treatment of anastomotic, 448; islet cell tumors and peptic, 458; serum amylase in peptic gastroduodenal perforation, 542

Umbilical cord, Hematoma of, 66; hematoma of, 265

Urea, Use of, in intracranial surgery, 334; reduction of intracranial pressure with hypertonic, 525

Ureter, Statistical analysis of calculi of, 276; comparison of permanent nephrostomy and permanent cutaneous ureterostomy, 277; experimental study of techniques of ureteroileal anastomosis, 277; transureteroureterostomy (contralateral ureteroureterostomy), 377; therapy of surgical lesions of, in women, 463; operative correction of retrocaval, 479

Urethra, Anterior transposition of, 174; urethroplasties for strictures, 175; diverticula of female, 279; reconstruction of, for treatment of severe strictures, 279; permanent perineal urethrostomy, 279

Urinary tract, Urinary lithiasis in children, 74; clinical value of indirect methods for determination of residual urine volume, 74; catheter drainage and infection in acute retention of urine, 74; vesicorectostomy, 75; kanamycin treatment of tuberculosis of, 172; anesthetic preparations for instrumental manipulations in urology, 172; vesicoureteral regurgitation in children, 173; calculosis of, in childhood, 174; uses of different bowel segments in urology, 175; ileocystoplasty using section of ileum as flat graft, 175; controlled hypotension in surgery of, 197; urinary difficulties after spinal anesthesia, 197; disturbances of, after radical surgery for malignant tumors of rectum, 253; postoperative disorders of bladder, renal pelvis, and ureter after Okabayashi's radical hysterectomy, 260; report on 93 ileal loop urinary diversions, 280; chronic infection of, treated with nitrofurantoine,

280; reactions associated with intravenous urography, 298; abdominal phlebography in urologic diagnosis, 376; management of gynecologic-urologic complications, 376; incidence of duplication of upper, 377; transureteroureterostomy (contralateral ureteroureterostomy), 377; group experience with ureteroileal cutaneous anastomosis for urinary diversion, 377; water requirements for renal excretion in full term newborn infants and premature infants fed variety of formulas, 473; earliest signs and symptoms in 127 male patients with genitourinary tuberculosis, 478; periureteritis plastica and perirenal fascitis, 478; radiocinematographic study of micturition, 480; micturition and cystometry, 480; stress incontinence of urine, 481; voiding urethrography, integral part of intravenous urography, 481; further observations on kinetics of urethrovesical sphincter, 481; aseptic management of catheter drainage, 481; infection of, after colporrhaphy, 548; incidence of urologic anomalies in association with major nonurologic anomalies, 553; roentgenograms of male urethra during micturition, 554; clinical use of renacidin in urinary calcifications, 554

Urine, Clinical value of indirect methods for determination of residual volume of, 74; catheter drainage and infection in acute retention of, 74

Uterus, Further studies on surgical cure of retroversion, 59; Strassmann operation, results obtained in 58 cases, 59; value of surgery in treatment of carcinoma of corpus uteri, 61; cervicectomy following supravaginal hysterectomy, 159; anterior or total pelvic exenteration in advanced cancer of uterine cervix or rectum, 159; rupture of, 162; rupture of, 168; tumors of vagina and, in children, 261; rupture of, 265; rupture of, 269; intractable hemorrhage from, due to abnormal subendometrial blood vessels after childbirth and miscarriage, 270; surgical management of complete prolapse of vagina and, 461; pseudopregnancy induced by progesteroids in treament of hypoplasia of, 461; endometrial biopsies in office, 547

Uterus cervix, Repair of incompetent internal os of, 59; exfoliative cytology during pregnancy for detection of carcinoma of, 60; diagnostic conization of; analysis of 235 operations, 60; area of, involved by carcinoma in situ and anaplasia (atypical hyperplasia), 60; cancer of, in South Viet-Nam, 60; carcinoma of; treatment by supervoltage irradiation only, 61; carcinoma of; interstitial radioactive colloidal gold therapy of lateral pelvic nodes, 61; early recognition of radioresistant carcinoma of collum uteri, 61; autoplastic transplantation of ovary in patients with cancer of, 160; habitual abortion caused by incompetence of, simple method of treatment, 164; cytologic prognosis in cancer of, 260; technique to increase value of cone biopsy from cervix, 260; radiation therapy for cancer of, 260; surgical management of carcinoma of, 260; statistical considerations on circumcision and cancer of, 261; blood sedimentation rate and diagnosis and prognosis of carcinoma of, 366; carcinoma in situ of, 366; carcinoma in situ and dysplasia of, 366; carcinoma of; treatment by radical hysterectomy following central irradiation, 366; carcinoma of, during pregnancy, 367; radiation and leukemia in carcinoma of, 404; prognostic factors in radioresistant cancer of, 462; evaluation of results of cases of cancer of, treated by Mitra's technique, 462; surgical treatment of carcinoma of, 462; evaluation of lymphadenectomy in therapy of cancer of, 462; surgical management of incompetent, 465; occult invasive squamous carcinoma of, 547

Vagina, Construction of functional; new surgical approach in congenital absence of, 63; congenital atresia of, 161; primary carcinoma of, 161; cytology of, as guide to treatment of habitual abortion, 164; tumors of uterus and, in children, 261; evaluation of electrovaginal potential recordings as therapeutic guide in gynecologic problems, 262; furacin (nitrofurazone) suppositories in, in operative gynecology, 263; prolapse of, following hysterectomy, 263; vaginal closure of posthysterectomy vesicovaginal fistulas, 367; surgical management of complete prolapse of uterus and, 461; primary carcinoma of, 464; extended use of Le Fort operation for prolapse of, in elderly, 548; Le Fort's operation, 548; urinary infection after colporrhaphy, 548; adequate anterior colporrhaphy, 548

Vagotomy, Transthoracic, for stomal ulceration, 40; and small resection in treatment of duodenal ulcer, 446

Varices, Therapy of bleeding esophageal, in children, 38; severe hemorrhage from esophagogastric, 52; use of vasopressin (pitressin) in control of bleeding from esophageal, 539

Veins, Results obtained by ligation of superficial femoral, 88; re-evaluation of posterior subfascial approach for ligation of communicating, in leg, 88; intraosseous phlebography, 201; persistence of left superior vena cava, 237; intraosseous vertebral plexus venography, 295; phlebography of lower extremity, 299; abdominal phlebography in urologic diagnosis, 376; role of fibrinolytic agents in thrombotic diseases, 387; fibrinolysin (plasmin) therapy in acute deep thrombophlebitis, 387; anticoagulant drug therapy for thrombophlebitis in lower extremities, 388; percutaneous splenoportal venography with additional comments on transhepatic venography, 402; mesenteric caval anastomosis, 493; intraosseous venography, recent modification in technique, 503; elastic stocking compression and blood flow of, 563

Vertebrae, Retropharyngeal cyst of foregut origin associated with abnormalities of, 116; x-ray projections of anatomic structures in cervical and lumbar, 503

Vomiting, By outpatients after nitrous oxide anesthesia, 293

Vulva, Primary carcinoma of, with special reference to leucoplakia, 63; ultrastructure of cancer of, 160; basal cell and basal-squamous cell carcinomas of, 161; carcinoma of, 263; pregnancy after radical vulvectomy for carcinoma of, 263; melanoma of, 369; pregnancy and delivery following extensive vulvectomy; 470

Weight, Thromboembolism and body, 388

Wounds, Severe accidental flaying, plea for initial conservatism, 91; ineffectiveness of suction in removing snake venom from open, 287; scar prognosis of, 392; development of new fibrinolytic enzyme and its use in surgical lesions, 393

Wrist, Anomalies of distal radioulnar joint, 79; fractures of os multangulum majus, 556
